

# Zotero for Research: Insights into Managing Sources

---

Cara Marta Messina and Jeff Sternberg  
Research Methods  
Megan Denver  
Fall 2019

# Managing Sources Class Discussion

Break up into small groups and talk amongst yourselves for five minutes; choose one person to report back to the larger group. Think about these questions:

- How do you manage your sources when you are doing research?
- Where do you look for sources?
- How do you save your sources?
- How do you remind yourself what each source is about and how you plan to use it?

# Workshop Agenda

- Objectives
- Why are citation management tools useful?
- Introduction to Zotero
- Important Zotero vocabulary
- Tutorial
- In-class hands on activity with Zotero

Slides & handout available at <http://bit.ly/dti-f2019-denver-citation>

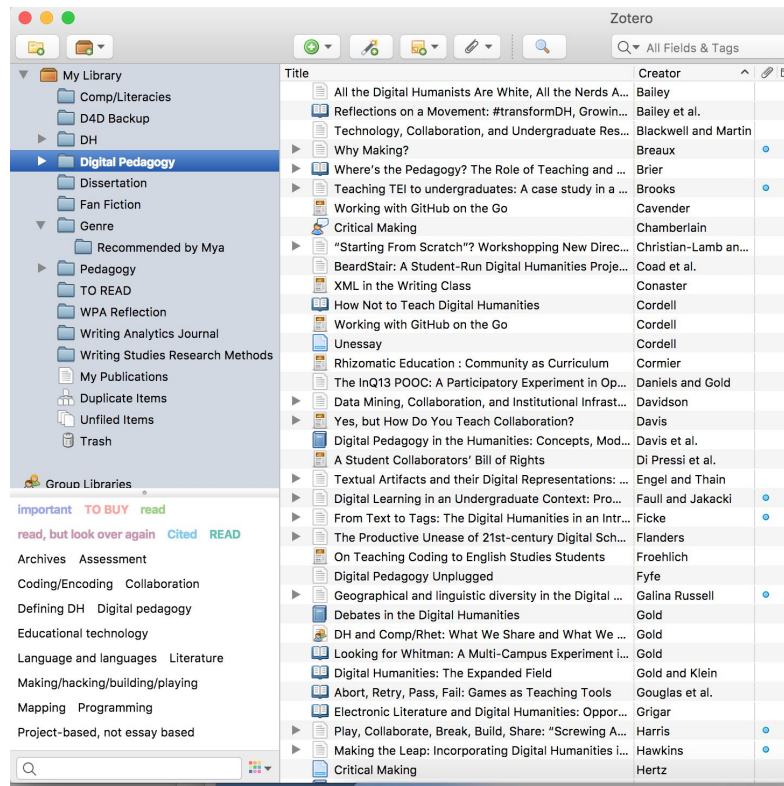

# Workshop Objectives

- Understand how to use a citation management software to organize research materials
- Understand Zotero's functions and features
- Define several important functions of Zotero and citation management, including libraries, ISBN, tags, and more.
- Input bibliographic information both manually and automatically into Zotero
- Transfer a library into a Works Cited page

# Why Use Citation Management Tools?

Citation management tools provide researchers with the ability to organize their primary and secondary sources, easily create citations and works cited pages for their research, and organize/maintain notes.

# What is Zotero?

“Zotero is a free, open-source research tool that helps you collect, organize, and analyze research and share it in a variety of ways” (“About”, Zotero).

- Store citation information on a cloud
- Finds bibliographic information for a source
- Provides flexible methods for organizing your bibliographies (libraries, tags, notes, etc)
- Stores PDFs (even annotated PDFs!) or links to the source
- Provides outputs of your citation information
- Connects to GoogleDrive, Chrome, Microsoft Word, and other applications

# Install Zotero

# Create an Account

<https://www.zotero.org/>

**\*\*IMPORTANT:** Your zotero libraries and info are stored in your Zotero *account* (not on your computer)

Northeastern University  
NULab for Texts, Maps, and Networks

*Feel free to ask questions at any point during the presentation!*

# Anatomy of Zotero

Toolbar

The screenshot shows the Zotero application window. On the left is the 'My Library' pane with a tree view of group and individual libraries. Below it is a list of keywords for tagging sources. The main pane displays a list of sources with columns for Title, Creator, and other metadata. On the right is the 'Info' pane showing detailed information about the selected source, including item type, title, editor, series, volume, edition, place, publisher, date, number of pages, language, ISBN, short title, URL, accessed date, archive location, library catalog, call number, rights, extra information, date added, and modified date.

**Your individual and group libraries**

**Your chosen keywords to tag each source**

**Information about an individual source**

**Your list of sources in a particular library**

Information about an individual source

at any point in time!

# Zotero Vocabulary

Knowing the vocabulary of a particular tool makes looking up documentation significantly easier.

- **Library:** the folders that store your citation lists
- **My library:** your individual libraries that can only be edited on your account
- **Group libraries:** collaborative libraries
- **Info:** the bibliographic info about a particular source
- **Notes:** your own notes taken about a source
- **Tags:** keywords chosen to organize and arrange sources

# Before we use Zotero:

Zotero is most useful when you are collecting sources. So, let's talk about finding proper sources for Research Methods

What are **databases**, **journals**, and **peer-reviewed articles**?

- Northeastern Library Database: <https://library.northeastern.edu/>
- Criminal Justice Subject Guides: <https://subjectguides.lib.neu.edu/cj>
- Useful Databases: JSTOR, PolicyFile, Criminal Justice Abstracts, and Academic Search Complete

**Choose a database and search for an article related to your research.**

# Practice Using Zotero

In your Zotero, create a folder titled “Class Tutorial” (you can delete this later). Look for the DOI number (unique identifier for scholarly articles, ex: 10.2307/358774) or ISBN number (unique identifier for books, ex: 978-0809335541)

Click the “Add Items by Identifier(s)” and paste in the DOI or ISBN number

# Zotero's Bibliographic Metadata

## Search ISBN 978-0809335541

Title	Creator
Fashioning lives: black queers and the politics of lit...	Pritchard

**Info** Notes Tags Related

Item Type Book

Title Fashioning lives: black queers and the politics of literacy

Author Pritchard, Eric Darnell

Info: bibliographic info

Notes: your notes (also sometimes notes are included when you enter ISBN numbers)

Tags: keywords (also sometimes keywords are included when you use ISBN numbers)

Related: choosing other sources that may be related

# Inputting Information Manually

1. Select the “New Item” button and find the type of source the article is
2. Input as much of the bibliographic information as you can
3. Use the “Notes” to keep track of important information (we will talk about this more in a second)
4. Use the “tags” to create keywords. Do not overload yourself with keywords. They should be chosen with purpose to help find similar content and organize your sources, not overwhelm you

# Demonstration: Inputting Manually

In your Zotero, create a new folder titled “Class Tutorial” (you can delete this folder later. Open up the readings sent over via email (Lu et. al, 2012; Wright et. al, 1992). We will:

- Figure out the correct citation information
- Determine the type of source
- Fill out the information from there
- Attach the PDF by dragging and dropping the file onto the proper source

# Drag and Drop PDFs for Biblio Data

If you already have a PDF of an article downloaded, you can **drag** and **drop** the PDF to Zotero and it will immediately input all the information.

The PDF, however, needs to have metadata attached to it; not every PDF will, but most you get from library databases should.

# Exporting your Bibliography

1. As a bibliography saved directly into your clipboard
  - a. Right-click your library
  - b. Click “Create bibliography from collection”
  - c. Choose your proper citation format
  - d. Paste the bibliography in your works cited page
2. As a CSV file (which can be opened on Excel) if you’re ever interested
3. Export it to other Citation Management (EndNotes, for example)

# Zotero Chrome Extension

If you use Chrome, there is a **Zotero extension** that you can download onto your Chrome and connect to your Zotero account. When you're researching articles, you can easily save your bibliographic information by clicking on the "Zotero" button on your Chrome toolbar (just make sure it's being saved to the correct library!). It will also save the HTML link or the PDF.

**\*Always double check that the citation information is correct in your Zotero library\*** (some websites do not provide proper metadata)

# Zotero on Google Docs

Your Zotero can now be connected to your Google Drive account. While you are writing a paper using Google Doc, you can use the Zotero plugin to create your bibliography for you!

**\*\*Always double-check that all the bibliographic information is correct and follows the proper citation format\*\***

# Your Turn!

Break up in a group and in your “Class Tutorial” folder, use Zotero’s features and/or manually input information for:

- Any New York Times article
- The two readings provided via email (Lu et. al, 2012; Wright et. al, 1992)
- The book *Algorithms of Oppression: How Search Engines Reinforce Racism* by Safiya Umoja Noble

Slides & handout available at <http://bit.ly/dti-f2019-denver-citation>

# Class Discussion

- First of all, any general questions?
- What did you find easy or challenging about using Zotero?
- How might you use Zotero in the future outside of this class?

# Thank you!
