during the presentation!*

Today's Activity: Create Your Own Webpage

- Your goal is to learn how to create your own Wix site for your final project
- DITI members will work alongside you to demo the creation of a web page on Wix
- These skills will help as you make your Wix website this semester for this class and remain useful skills for making professional websites in the future

Website Development Best Practices

- Always remember your audience and think about how you want to represent your **identity** and your work to that audience.
- Use the “**Preview**” button to see how your site will appear to your audience.
- **More ≠ better!** You want your website to be easy to navigate, informative, and appealing.
- Pick a theme/format that is **compatible with mobile phones**.
- Design choices should be based on the **content** you are communicating.
- For maximum readability, **use simple fonts and a high color contrast** between text and background color. This is particularly important for accessibility.

Good

Good

Not so good

Not so good

Review: Website Building Vocabulary

- **Pages:** These are the main areas of your website that your audience will be able to navigate in your site's menu
- **Domain:** Your domain name is the unique URL that leads to your website
- **Design:** the aesthetic choices for your website, including colors, font, and more

Building for your audience

- A website is just like a research report or an essay - it needs to clearly communicate its message or purpose to a specific audience.
- Critical first steps in website design are to consider **WHO** your audience is, **WHAT** they will need to be able to find and do on your site, and **HOW** they will move through the site.
- It can be tempting to add media and components to a website that *don't* contribute to the site's message/purpose; going into any site-building platform with a clear idea of what your site needs is essential!

Planning your website (overall considerations)

Audience (Message/Purpose)

Content (Posts, Bio, Images)

Navigability (Headers, Pages, Menus, Hyperlinks)

.....

User Experience / Accessibility (Interactivity, Color scheme, Readability, Alt text)

Design (Color scheme, Font size, Typeface)

Media (Images, Embedded elements)

Other Functionalities (Widgets, Buttons, etc.)

Starting Points: Questions to Consider

- *Who* is this site for?
- *Why* would your identified audience(s) visit your site?
- *How* will they find what they need, and navigate around?

Starting Points: *More* Questions to Consider

- **What is the purpose** of this site?
 - How can you communicate this clearly in the site's content and design?
- **Can *everyone* use your site effectively?** Is it accessible on mobile devices, and to people with disabilities?
- How can you make **smart design choices** to enhance the site's
 - Look
 - Navigability
 - Interactivity
 - Functionality
 - Accessibility

Building Your Website in Wix

Northeastern University
NULab for Texts, Maps, and Networks

*Feel free to ask questions at any point
during the presentation!*

Getting Started

+ Create New Site

- Go to <https://www.wix.com/> and click “**Sign In.**” Sign up for a Wix account, using an email that you associate with your professional identity.
- With your Wix account, you can make multiple websites. To create your class website, click “**Create New Site.**” With Wix, you don’t pick your domain name until later.
- You can use Wix’s **Design AI** feature or build the website from a template using Wix Editor.
Note: Wix Editor is not covered in these slides.

Wix Vocabulary

- **Section:** Each page is divided into large chunks of content called “sections.” These sections (images, text, videos, etc.) can be easily swapped around to rearrange the layout of the page. Sections are Wix’s version of WordPress **blocks**.
- **Apps:** These are specific Wix-created applications that you can add to your site, including blog posts and different types of forms. Apps are Wix’s version of WordPress **widgets**.

Using Wix Design AI

Wix ADI will ask generate a website draft based on your answers to questions such as:

- What type of website do you want to create?
- What do you need on your new website?
- Do you want to import images and text? (you can skip this step)

Let Wix ADI Create a Website for You

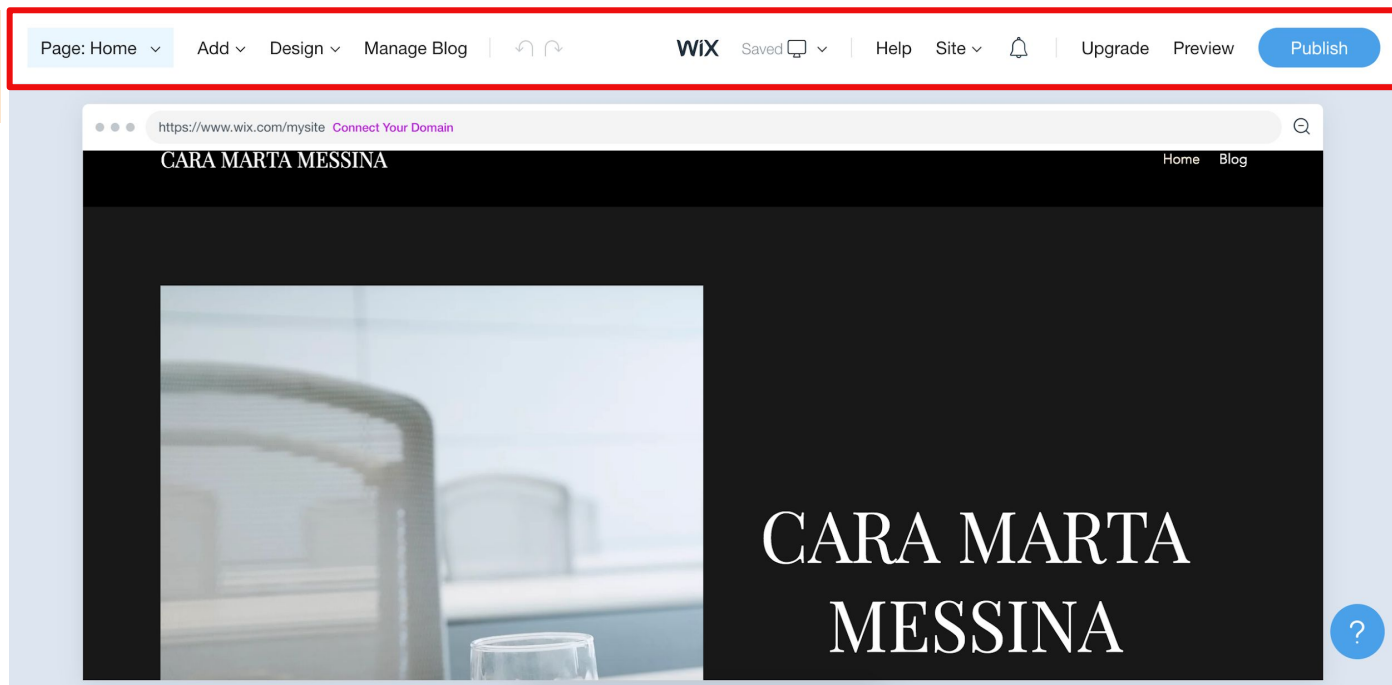

Answer a few simple questions and automatically get a website designed just for you in minutes.

Navigating your Site

To get back to your site when you log in, choose “**My Sites**,” then select your site.

Navigating your Site

Navigate around your site using the drop-down “**Page**” menu on the side.

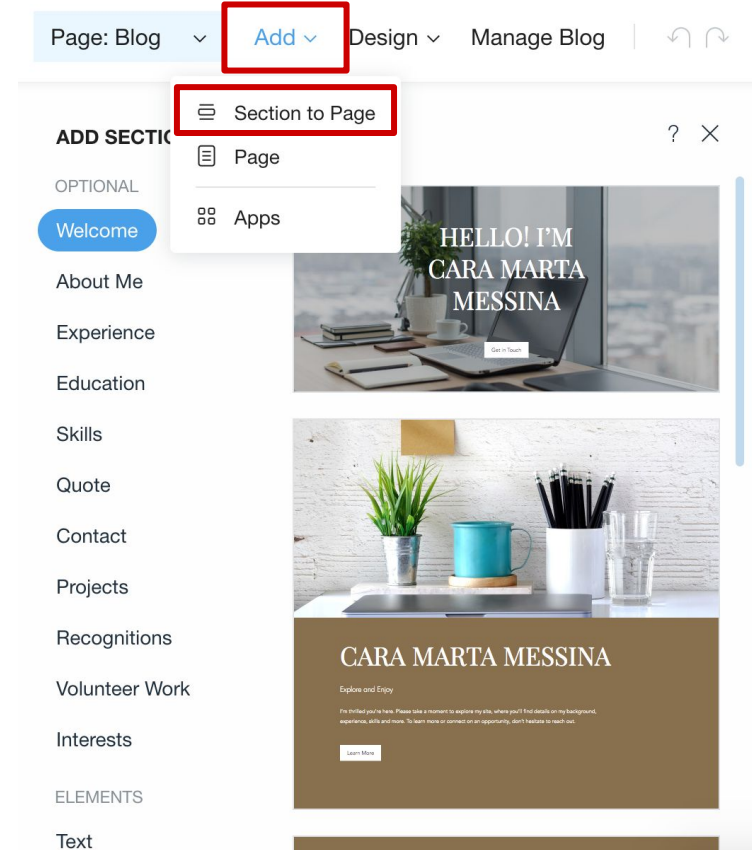

Change Your Design

The “**Design**” button will help you change the global **design** of your website: either the overall **theme**, or specifics like **colors**, **fonts**, and **animation**.

Add Pages/Sections

- Add new pages or sections by clicking the “Add” menu
- Choose your content and **drag and drop** it to the area on your page.

Example of Adding a Page & Section

Types of Sections to Add

- **Elements:** basic components, such as text, images, and videos
- **More sections:** these have specific purposes, such as Instagram feeds, CV (resumé), and FAQ
- **Forms:** Contact Forms, Testimonial Forms, etc.
- **Optional sections:** Based on your website's purpose according to your ADI's results, you will get some recommended sections. For example, if you chose "Portfolio & CV," your optional sections might revolve around your work experience.

Edit Sections of Your Site

Step 1:
Choose the
page you
want to edit

Step 3:
Use the bar
on the left
side to make
edits to this
section,
including
design edits

The screenshot displays the Wix website editor interface. At the top, a navigation bar includes a dropdown menu labeled 'Page: Home' (highlighted with a red box), followed by 'Add', 'Design', and 'Manage Blog'. To the right are icons for 'Wix', 'Saved', 'Help', 'Site', and a 'Publish' button. Below the navigation bar, the main editing area is divided into two panels. The left panel, titled 'ABOUT ME', contains a 'Section Design' preview and a settings bar with fields for 'TITLE' (set to 'Bio'), 'SUBTITLE', 'DESCRIPTION' (with a text preview), and 'MEDIA'. The right panel shows a live preview of the 'ABOUT ME' section on a website, with an 'Edit' button (highlighted with a red box) in the top left corner of the section. The preview shows a dark background with the title 'BIO', a paragraph of text, and a 'Get in Touch' button.

Step 2:
Hover over
the section
you want to
edit and click
the “Edit”
button in the
top right
corner

Manage Sections

These three dots open a menu that gives you the option to duplicate and delete sections

Use these arrows to change the order of sections on the page

Add Media to Your Site

Step 1:
Go to “Add Section” and click “Video” (or Media Gallery if you want to add multiple items)

The screenshot shows the Wix website editor interface. At the top, there's a navigation bar with 'Page: Home', 'Add', 'Design', 'Manage Blog', and various utility icons. Below this, the 'ADD SECTION' menu is open on the left, listing various sections like 'Recognitions', 'Volunteer Work', 'Interests', 'Text', 'Image', 'Video' (which is highlighted with a red box and a checkmark), 'Gallery', 'Media Gallery', 'List', 'HTML Embed', and 'MORE SECTIONS'. The main workspace shows a webpage layout with a blue header, a large blue section with the text 'Drag Section Here', and a video section (also highlighted with a red box) that has been added. The video section displays a placeholder image of a sunset and a play button icon. Below the video section, there's an 'Embed Section Title' and a code editor icon. The bottom right corner of the editor has a blue circle with a question mark icon.

Step 3:
Change the URL/video file to your content (you can also edit text and design elements at this time)

Step 2:
Select the layout you like best

Feel free to ask questions at any point during the presentation!

Adding Apps

- In Wix, you have the option to add **apps**. These include:
 - Blog
 - Discussion forum
 - Bookings
- You can select from a full list of apps by clicking **“Add,”** then **“Apps”**

Thank you!
