

Storytelling with Mapping: Knight Lab StoryMap

Digital Integration Teaching Initiative
Taught by Halima Haruna & Sara Morrell
HIST 3330 The Global Cold War
Professor Heefner
Spring 2025, Jan. 30 2025, 9:50am

*Feel free to ask questions at any point
during the presentation!*

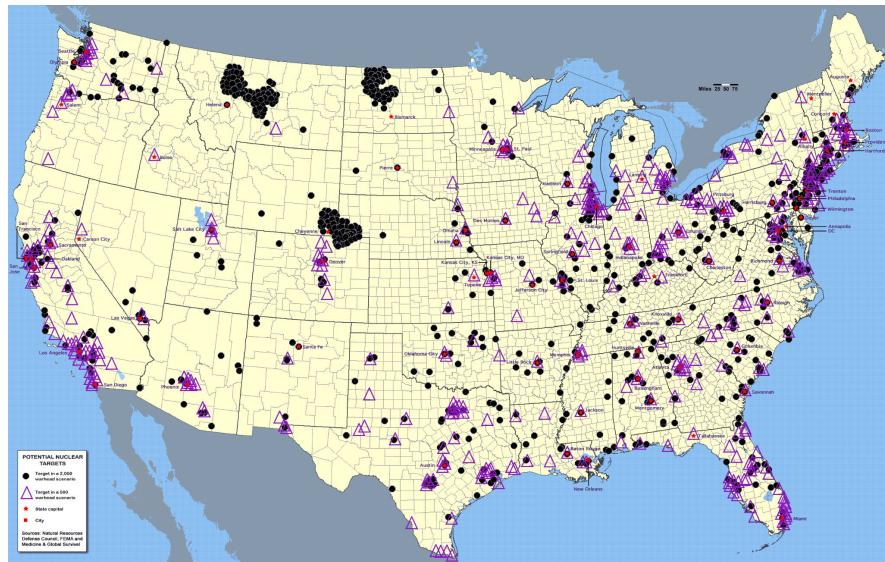

Workshop Agenda

- Slides and handouts available at:
<https://bit.ly/sp25-heefner-hist3330-storymap>
- Best practices and questions to consider before creating your StoryMap.
- Learn about StoryMap as a mode of conveying data and content.
- Examine how foreign policy and national security can intertwine with mapping.
- Demonstrate steps for using Knight Lab's StoryMap.
- Start building!
- For more information, please see: <https://bit.ly/handout-storymap>

Maps' different uses

Maps can convey all sorts of geospatial information that can facilitate different applications:

- Navigational/orientational maps
- Geological/topographical maps
- Political maps
- Thematic maps
- Artistic maps
- Narrative maps

Warhead Map from FEMA

What are the limits?

- Maps reflect the intention of the map-maker and are **inherently limited**.
 - Maps produce **shared interpretations**, and are not expressions of objective spatial relations.
 - Boston is as much a human idea as a physical space, and thus maps both *represent* and *create* reality. See Quincy Langford's "[Maps Are a Tool to Understand the Past and Shape the Future](#)" to explore how maps can create, erase, and reshape.
- The **simplicity** and **clarity** of maps is deceiving, but **artificial clarity** is necessary for the map to be **useful**.

What is a StoryMap?

KnightLab's StoryMap tool allows users to tell narrative stories connected with specific geographic locations.

https://narrative.knightlab.com/citgo/fenway_walk.html

Welcome to the Fenway

Welcome to this Community Walk! The purpose of this walk is to introduce people to the history and context of one of the neighborhoods that surround Northeastern. Most importantly, this walk is designed using an Asset-Based Community Development (ABC) perspective. ABCD is a philosophy that recognizes communities' abilities to achieve positive change using their own knowledge, skills, and lived experiences as well as existing resources and infrastructure.

Another way to think about it is to consider a community's strengths rather than

of saying, "This community has a high crime rate and it can't be fixed," we say, "This community has an organization that serves the previously incarcerated and is collaborating within the community to work towards

Aerial view of buildings along Fenway road looking North towards Boylston Street.
Autumn view of buildings along Fenway road looking North towards Boylston Street.

Another way to think about it is to consider a community's strengths rather than

of saying, "This community has a high crime rate and it can't be fixed," we say, "This community has an organization that serves the previously incarcerated and is collaborating within the community to work towards

Aerial view of the CITGO sign and the buildings along Boylston Street in the Kenmore Square area of the Fenway neighborhood.

Fenway Community Walk

Welcome to this Community Walk! The purpose of this walk is to introduce people to the history and context of one of the neighborhoods that surround Northeastern. Most importantly, this walk is designed using an Asset-Based Community Development (ABC) perspective. ABCD is a philosophy that recognizes communities' abilities to achieve positive change using their own knowledge, skills, and lived experiences as well as existing resources and infrastructure.

Another way to think about it is to consider a community's strengths rather than

of saying, "This community has a high crime rate and it can't be fixed," we say, "This community has an organization that serves the previously incarcerated and is collaborating within the community to work towards

Why use a map to tell stories?

- StoryMaps help us **render visualized, spatialized, and contextual information about spaces** in the past or today.
 - StoryMaps can be about places you've never been to. The goal is to help users “see” the spaces/places/routes as accurately as possible, and to get a sense of the people and things in the environment.
- Think about StoryMaps as **giving directions**, relating not only direction and **distance** but also **sequence**.

Example Projects Using Maps to Tell Stories

- “[Fallout Five Zero](#)”: chronicles public fallout shelters in Boston and Quincy including pictures of signs and location.
- “[Emergency Shelters Map](#)”: a Neighborhood emergency shelter map built by the City of Boston.
- “[FEMA’s Nuclear Attack Planning Base Final Project Report](#)”: a report that present the fallout risks to U.S. populations by state counties.

Making a StoryMap

*Feel free to ask questions at any point
during the presentation!*

StoryMap Best Practices

- Think carefully about the **audience** you are trying to reach with your map. This will impact your language, the order of your points, and the media that you choose.
- Think also about the **tone** of the map: the default for StoryMap can be very upbeat and informal, and that may not match the content you are sharing.
- **Test your map** after you have created it, to make sure that all the narrative points flow and that the language is clear and concise.

Optional: Spreadsheet Template

Make a copy of the StoryMap template below and use it to fill in the different sites you want to map, images you want to include, etc.

StoryMap Spreadsheet Template

Template based on the StoryMap Spreadsheet Template created by Molly Brown, Reference and Outreach Archivist, Northeastern University Library.

For more information about collecting and organizing data for StoryMap, please see:

<https://bit.ly/handout-storymap-spreadsheet>

Data collection: Site

The slide number can serve as the order in which your sites appear on your map and the site name can be used to label sites on your map.

The site location is used to identify a point on your map where the site is physically located (address or coordinates).

The headline can serve as the official title or label of your site. Including a narrative provides more context as to why your site is important.

Don't forget to cite your sources!
Also, you may want to include additional media related to your site (e.g. newspaper clippings, additional photos, etc.).

Create a StoryMap

- Go to <https://storymap.knightlab.com/>
- Click “Make a StoryMap.” 
- Either create a new account or sign in through Google.
- Once you’re signed in, click “New Map” (once you have created your map, it will be there for you to work on).
- Name your project.

Your StoryMap

The screenshot shows the StoryMap JS application interface. At the top, there's a navigation bar with 'My Maps' (with a red '(untitled)' placeholder), 'Options' (highlighted with a blue box and connected by a blue line to the 'Save' button), 'Save' (highlighted with a blue box and connected by a blue line to the 'Options' button), 'Publish Changes', 'Help', and 'Share'. Below the navigation is a world map with a title slide message: 'This is your title slide. The title slide shows all points from your other slides.' In the bottom left, there's a slide editor for a new slide titled 'Untitled'. It includes sections for 'Media' (with a placeholder 'No Media Selected'), 'URL to your media' (input field), 'Upload an Image' (button), 'Credit' (input field), 'Caption' (input field), and rich text editing tools ('B', 'I', 'HTML'). To the right is a 'HEADLINE' section with a rich text editor. At the bottom are 'Marker Options' and 'Background Options' buttons.

Overall options (like changing map layout)

SAVE OFTEN!

Your StoryMap: Slides

The screenshot shows the StoryMap JS interface. At the top, there are navigation buttons: 'My Maps', 'Options', 'Save', 'Publish Changes', 'Edit', and 'Preview'. A blue box highlights the 'Preview' button. To the right of the preview buttons is a 'Help' dropdown. Below the buttons is a sidebar with a red icon and '(untitled)' text, and a '+ Add Slide' button. The main area features a world map with a light blue background and white landmasses. A text overlay says, 'This is your title slide. The title slide shows all points from your other slides.' At the bottom of the slide area, it says 'Address search geocoding generously sponsored by Mapbox.' On the left side of the main area, there's a 'Media' section with fields for 'URL to your media', 'Upload an Image', 'Credit', and 'Caption'. Below this is a note 'Accepts HTML'. On the right side, there's a 'HEADLINE' section with a rich text editor toolbar ('B', 'I', 'HTML', '%') and a text input field. At the bottom right of the slide area are 'Marker Options' and 'Background' buttons.

Check out and add new slides here

Preview the geographic points in all of your slides

Preview your slides

Your StoryMap: Media and Text Boxes

The screenshot shows a StoryMap interface with a world map background. At the top, there are navigation buttons: 'My Maps', 'Options', 'Save', 'Publish Changes', 'Help', and 'Share'. Below the map, there are two text boxes: one orange box containing 'Title and content of your text box' and another orange box containing 'Color or image for text box background'. A blue line points from the left side of the orange box to a 'Media' section on the left, which includes fields for 'URL to your media', 'Upload an Image', 'Credit', and 'Caption'. Another blue line points from the right side of the orange box to a 'Background Options' button at the bottom right of the interface.

Accepts [HTML](#)

Marker Options

Background Options

Options for designing your map

- The “Options” button in the top left allows you to change the design of your map.
- Customizable options include Language, Fonts, Call to Action, Map Type and more.

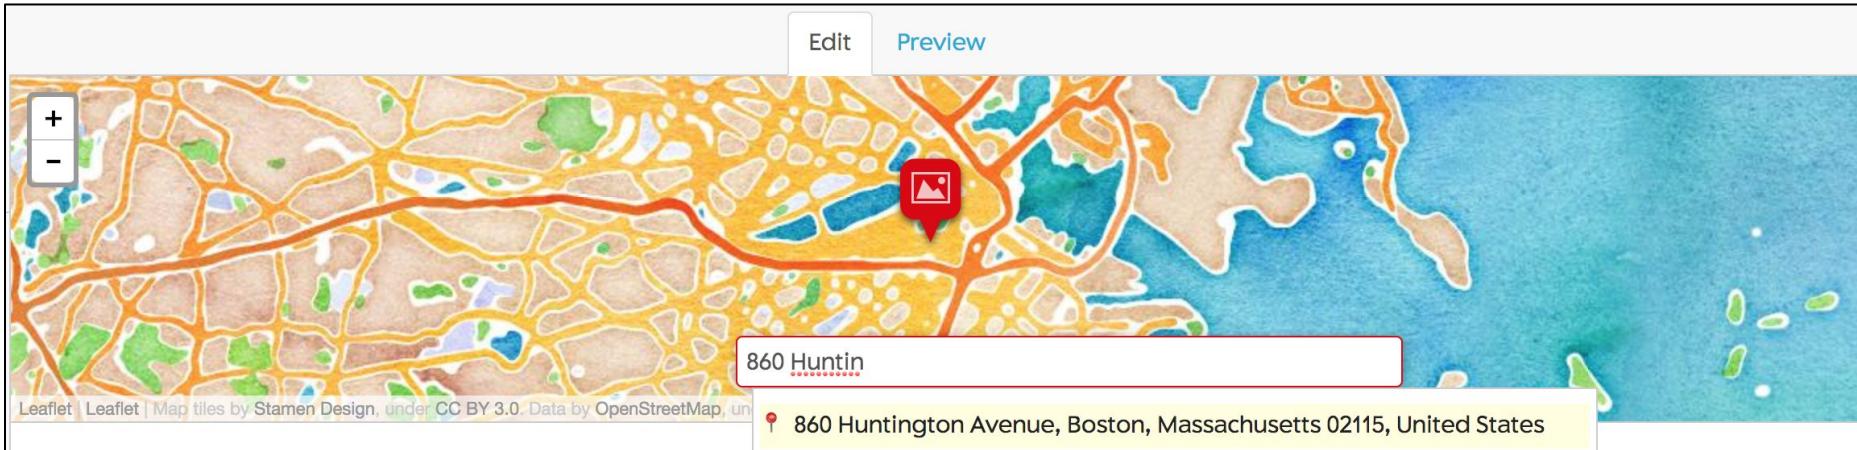

Slides, or map markers

Each slide is a different marker point on your map. Each slide contains:

- Title and text. The text box reads basic HTML.
- A background image or color.
- A map marker, which can be placed by searching for Google Maps locations or by placing the marker manually.
- Media: images, videos, and sound files can be uploaded. Since only *one* media file can be uploaded per slide, you can use the text box's HTML to integrate additional images or other media types.

Add A Location

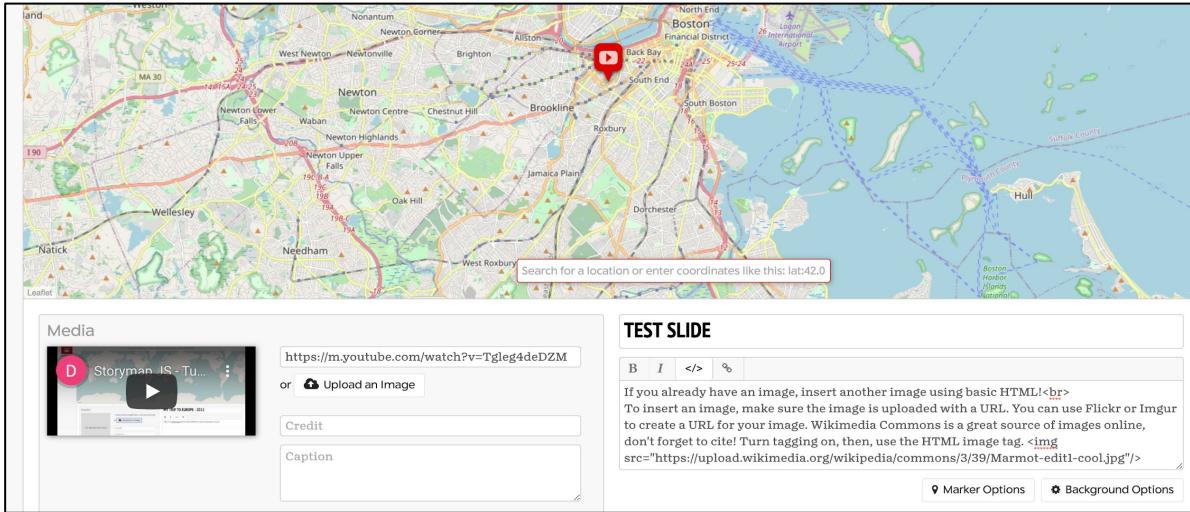

KnightLab StoryMap uses **Mapbox** to locate addresses

StoryMap, however, does **not** always recognize place names; you might need to know the **address** or location of particular structures

You can also **drag and drop the map markers** to the specific location

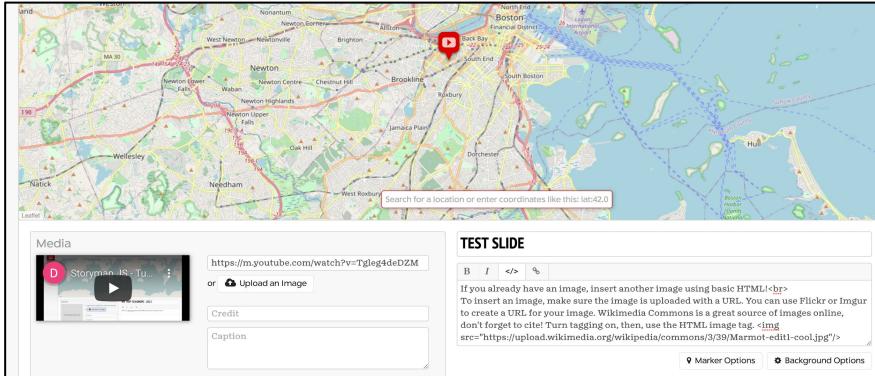

Feel free to ask questions at any point during the presentation!

Add Media and Images to a Slide: Upload or URL

Use “media” to upload files. You can upload an image or put a **URL** of an image OR a video (like a YouTube video). If you want to include your own video, you will first have to upload it to YouTube or other online publisher and copy that link.

Add Media and Images to a Slide:HTML

If you have an image or a video in the “media” section, but want to include an image **in the text**, you can! The text box reads basic HTML.

1. Click the </> button (turn on HTML)
2. Get a URL of your image. Use Wikimedia Commons to search images by content, and filter by license type and image size. Make sure to use the embed file code, and don't forget to cite the source!
3. Use the HTML `` tag to insert the image.
4. Check the “Preview” to see the image. Smaller image sizes may appear as a thumbnail, so stick to larger image sizes and preview your end result!

Embed codes and image files

If you are adding an image via its URL, make sure that you select the link with **the image file itself**, not just a page with the image on it.

For example, to add an image from Wikimedia Commons, follow these steps:

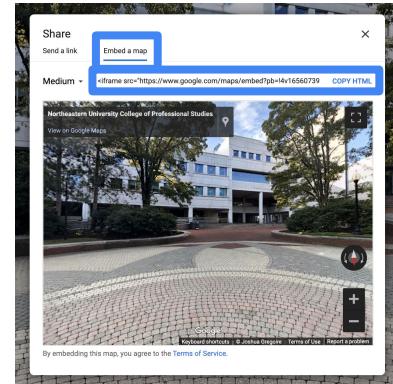

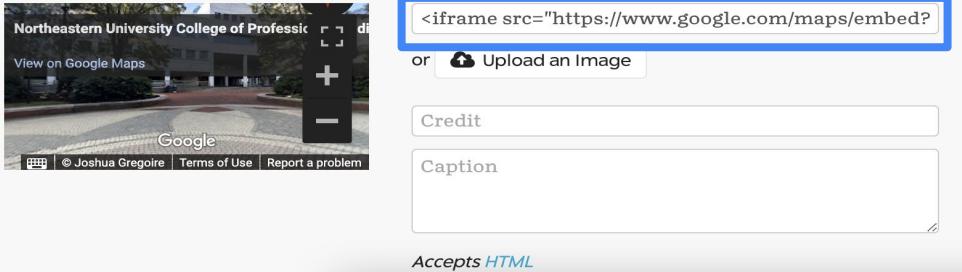

1. Go to "More Details" and choose "Use this file on the web," or just choose "Use this file on the web" if you see that option.
2. Copy the "File URL."

Add Google Street View to a Slide

As with other media, you can insert a Google street view map into a slide by entering its **URL**.

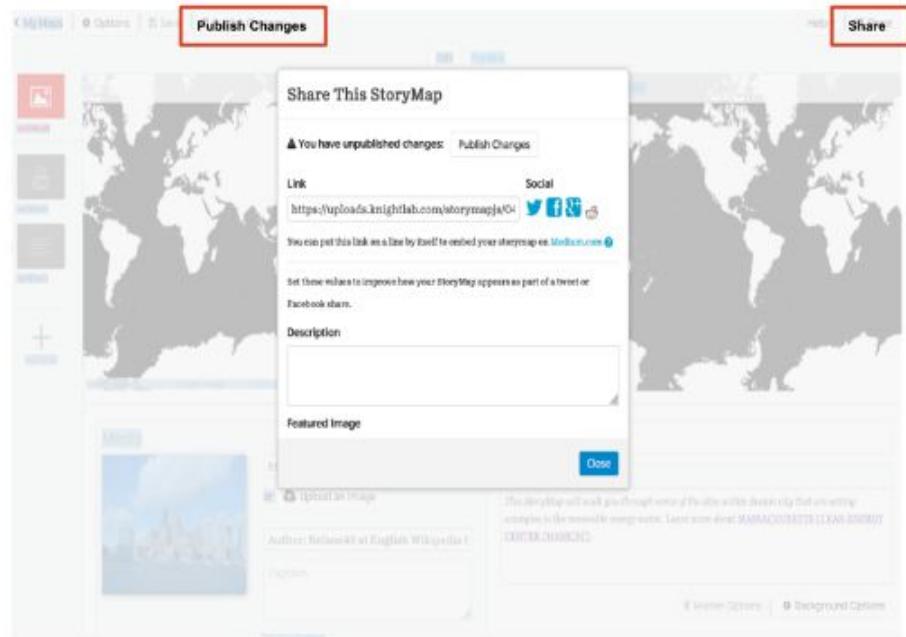

- Click “Share or embed image” from the menu in Google Maps, and copy the **HTML** link from the “Embed a map” tab.
 - Make sure the link has the `<iframe src="URL"></iframe>` code (it should automatically, but the map won’t work without it!).
- Enter the URL into the “URL to your media” box.

Media

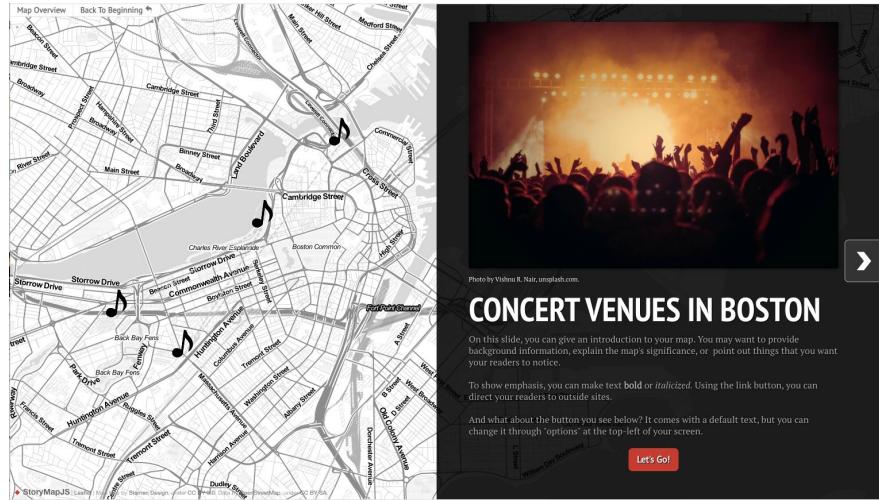

Publish and Share Your StoryMap

- Click the “Publish Changes” button on the top left side on the editing page.
- StoryMap’s “Share” button is in the top right corner.
- You can add a description and feature image here before sharing your StoryMap widely.

StoryMap Demo

- To see StoryMap in action, click on this [Sample Map Link!](#)
- Here you will be able to explore a map custom-made by DITI to highlight your options for creating maps.

Best Practices and Advanced Options for StoryMap

*Feel free to ask questions at any point
during the presentation!*

A Note on Save States (1/2)

StoryMap does not keep older versions of your project, so once you make and save changes, **you cannot retrieve a previous version**. You can also write over new content if you have your StoryMap open in multiple browser tabs or windows at once.

This is one reason why it is a good idea to plan out your StoryMap in a separate document: if you lose progress, you will have your content saved somewhere else.

A Note on Save States (2/2)

Since you cannot retrieve older versions of the project, and you can write over work in separate windows, this can create a different problem when working on a group project.

It is important to assign individual users to certain sections of the StoryMap spreadsheet so as to prevent any overlap in data entry when doing a project with multiple users.

Image sharing and permissions

- It is important to verify that you are allowed to use images before you put them in your StoryMap.
- Search for media that is public domain or shared with permissions that allow re-use.
 - DITI recommends [Wikimedia Commons](#) and DPLA ([Digital Public Library of America](#)).
- Ensure proper credit/attribution is given for all media
- For more information on copyright and reuse, please see:
<https://bit.ly/fair-use-handout>

Accessibility in StoryMap

- Alt-text is a description of a digital image attached to the image file. People that use screen readers are able to hear content you include in:
 - Image captions
 - Text box (for embedded images and media)
- If linking media, be sure to use a descriptive link name.
- For more information on accessibility in StoryMap, please see:
<https://bit.ly/storymap-accessibility-handout>

Data Privacy

- It's important to pay attention to data privacy when using digital resources
- At its simplest, **data privacy** is a person's ability to control what of their personal information is shared and with whom.
- To help you make informed decisions about interacting with digital tools in ways that honor your boundaries with your data and/or personal information, The DITI has prepared a handout on **Data Privacy**

A Note on HTML

- You can use HTML to have more control over the display and behavior of StoryMap. Look for the “Accepts HTML” language or this symbol: </>
- For more information on HTML, please see:
<https://bit.ly/handout-HTML>

Helpful HTML Codes

#Change Text Color
YOUR TEXT
HERE

#Add Link in Caption/Credit
text

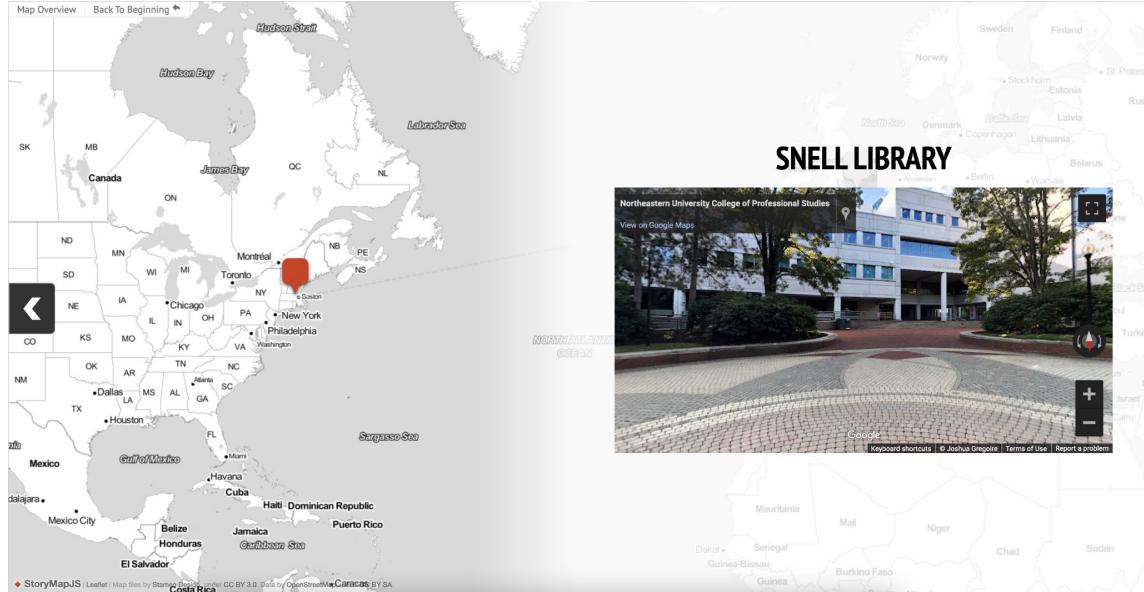

#Add Image/Media in Textbox

#Add Alternate Text to Image/Media

*Feel free to ask questions at any point
during the presentation!*

A Note on Zoom Levels

StoryMap does not let you set how far zoomed in or out your slides will be. The zoom level is determined automatically according to the distance between your locations.

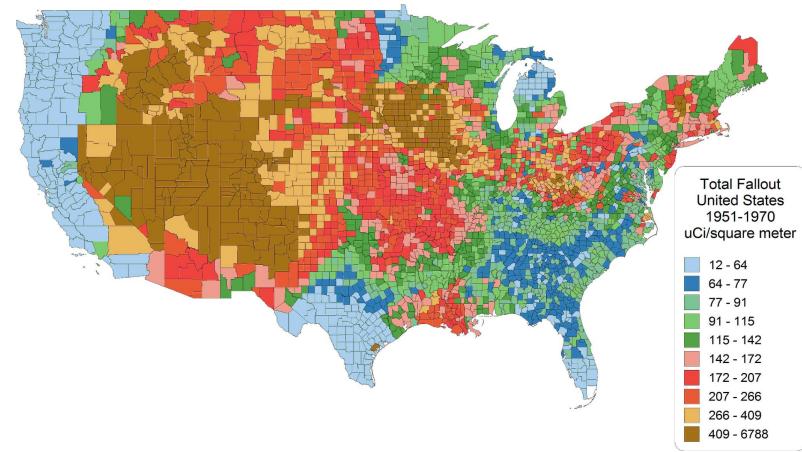

Discussion

*Feel free to ask questions at any point
during the presentation!*

Questions for critiquing maps

- What is its subject?
- Who is/are the map's audience(s)?
- What is its message, argument, or purpose?
- How and when was the map made?
- Who made this map? What choices did they make?

From "[Critiquing Maps II](#)", by
Shannon Mattern

[Total Fallout United States](#)
[1951-1970](#), Richard Miller

Feel free to ask questions at any point during the presentation!

Mapping, Power, + History

“Maps are ideological blueprints—they frame the language of politics in a melding of signs and symbols that both reflect and create colorful and charged worldviews... maps communicate volumes not just in what they include but also in what geographer J. B. Harley called the “silences,” or what maps choose to omit and obscure from view.” — Timothy Barney, “[Mapping the Cold War: Cartography and the Framing of America’s International Power](#)”

Three Cold War Digital Mapping Projects

- Geographic:
 - [Eight “Hot Wars” During the Cold War](#)
- Timeline:
 - [Mapping History: The Cold War](#)
- Thematic:
 - [Decolonization and the Cold War Thematic Map](#)
 - [Cold War Europe Military Alliances Map](#)

Demo

*Feel free to ask questions at any point
during the presentation!*

Your Turn!

Try out the below:

- Identify a site
- Create a StoryMap
- Edit the layout
- Add a slide
- Add a location
- Add media and images
- Publish and save

*Feel free to ask questions at any point
during the presentation!*
