Introduction to WordPress

Individual Class Info

Creative Writing
Fall 2022/Spring 2023
Sam Kemp

Summary of Module

This module will cover creating and designing a website using WordPress. It demonstrates how to sign up for an account with the WordPress content management systems (CMS), create a website through your specific CMS's username, choose templates, and customize your website based on audience, project themes, media to be included, and more.

Learning Goals

- Understand the layout and choices available through WordPress
- Better articulate your intended audience and design choices to appeal to that audience

Learning Objectives

- Create a WordPress website
- Use specific CMS features, like the "Add" function
- Create a blog section on the WordPress website

Materials for Module
