

Introduction to FrameVR and 3D exhibition design

ANTH 2800: Museum Anthropology

Prof. Nina Sylvanus

Fall 2026

Digital Integration Teaching Initiative

*Feel free to ask questions at any point
during the presentation!*

Workshop Objectives

- What is FrameVR? Why we use it?
- FrameVR vocabulary
- Getting started
- Create your FrameVR

Link to module materials:

FrameVR Basics

during the presentation!*

What is FrameVR?

- It is tool to create spacial 3D and VR environments
- It can be used directly in the browser
- It supports three environments in the free version
- It does not require a software installation to use it

FrameVR Vocabulary

Dashboard

Inventory

Settings

Scenes

Main Toolbar

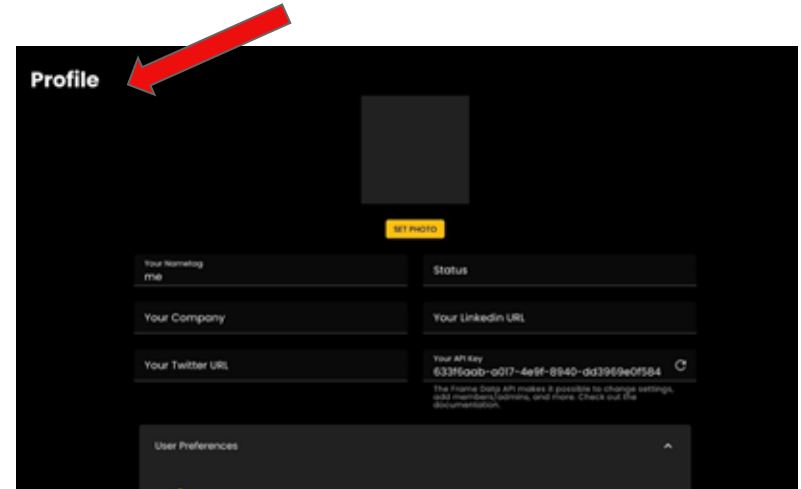

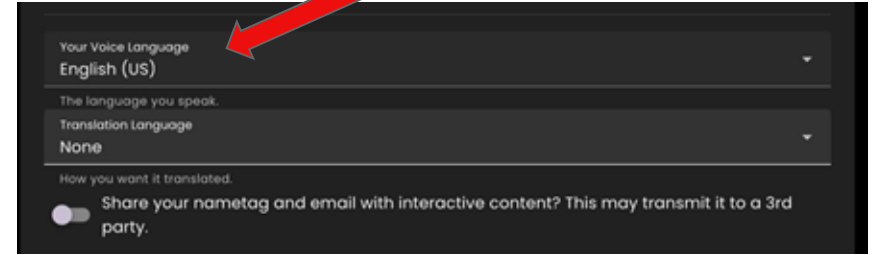

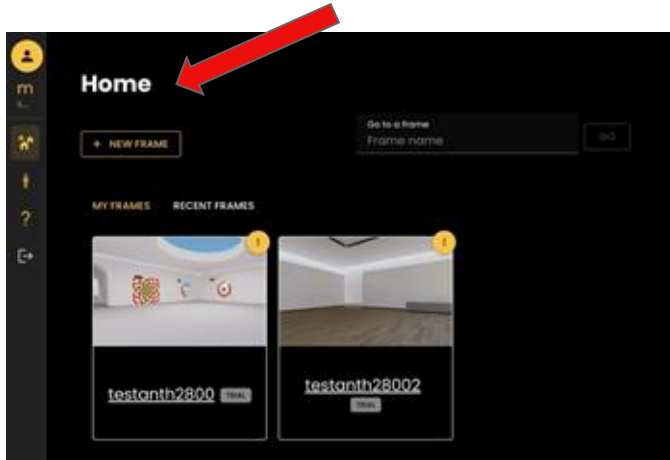

Support

Sidebar menu

Frames

Main dashboard

- Dashboard (Home)
- Profile settings
- Language settings

Main toolbar

The main toolbar is located at the bottom-center of the frame

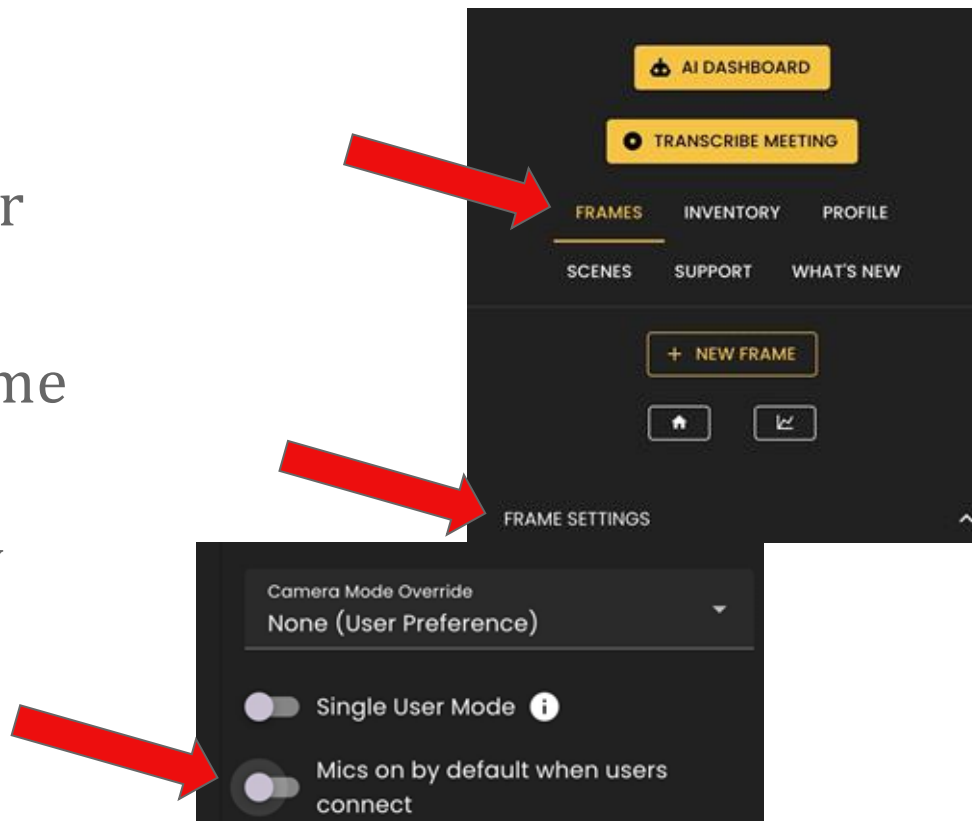

Sidebar menu

Sidebar menu is located at the top right section of the screen

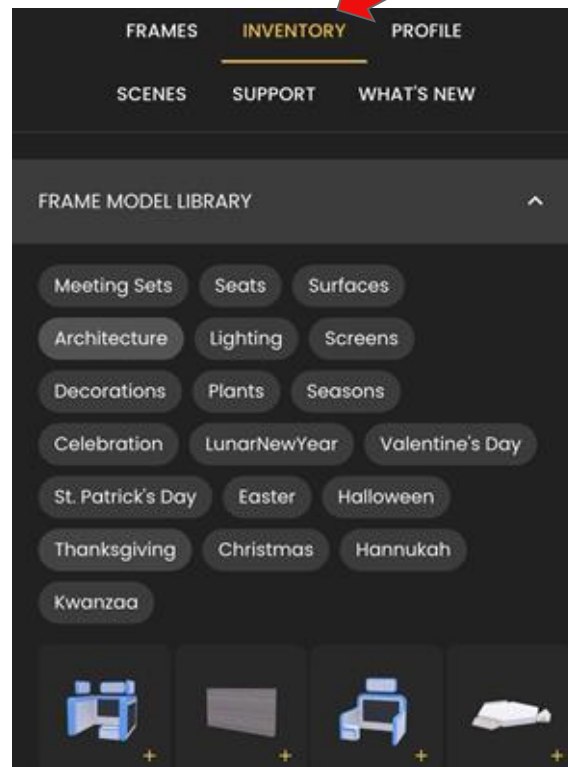

Frames

- Navigate to the Sidebar Menu
- Click Frames then Frame Settings
- Toggle the “Mics on by default when users connect” off

Inventory

The Inventory menu enables to add or upload models, audio files, PDFs, images, videos, and other assets

Scenes

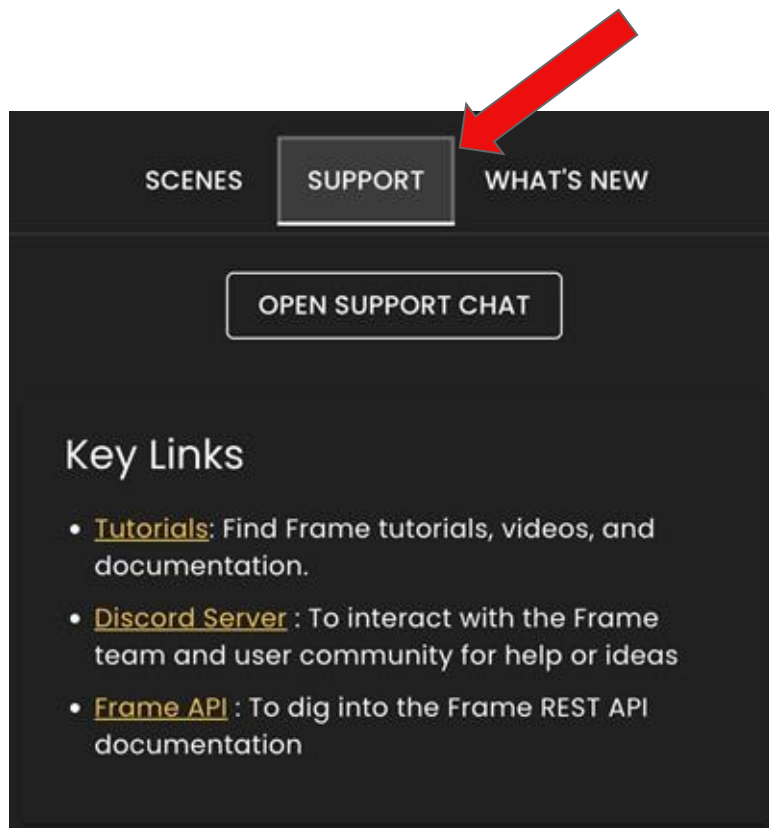

Each scene is a 3D canvas allowing to showcase different assets to your audience.

In the example you see the rocket on Scene 6 of 17, and an engine on the Scene 7 of 17. The background for both is the same.

Support

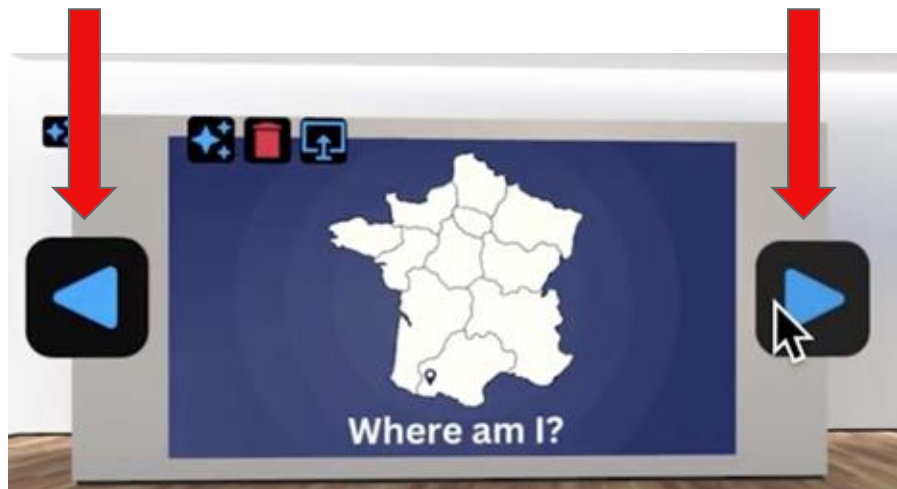

The Support feature in the Sidebar Menu contains essential links and resources when needed

Interactive display

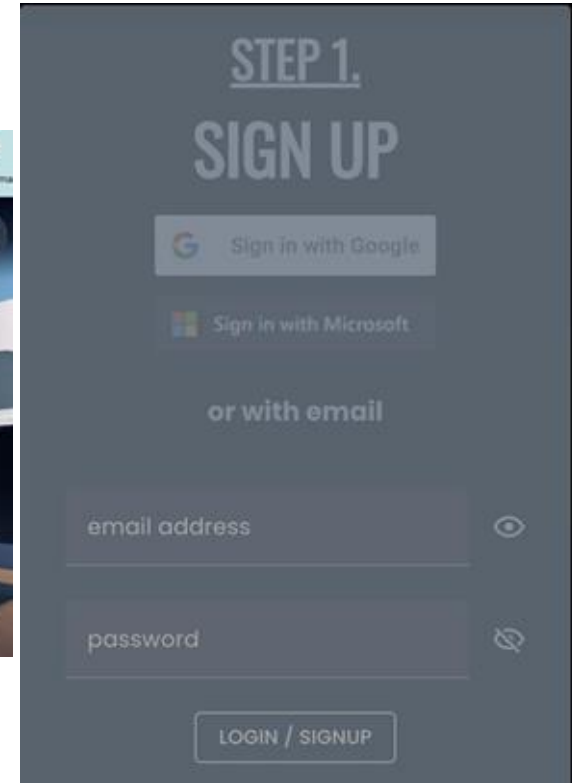

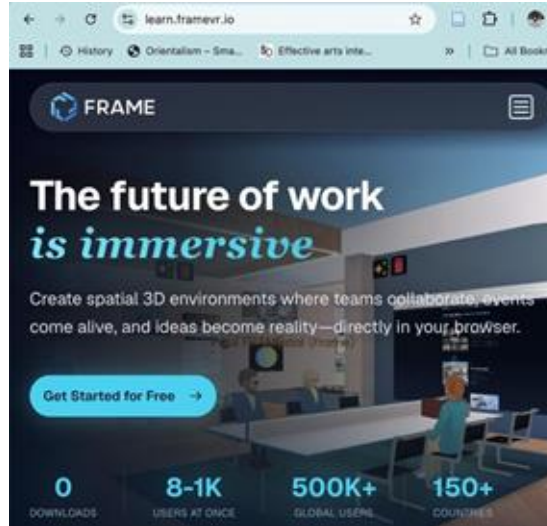

Upload a pre-existing PDF to create an interactive exhibition artifact

In the example the arrows allow to scroll through the pages of the PDF making the display interactive

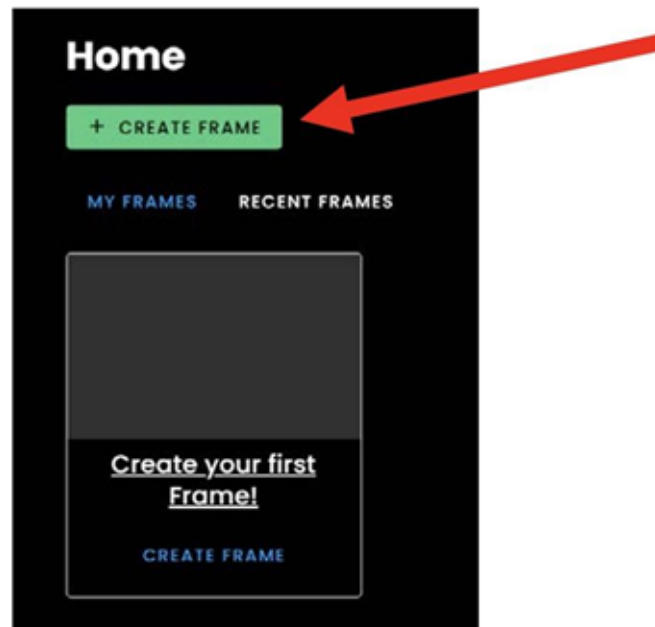

Getting started

- Navigate to framevr.io
- Select “Get Started for Free”
- Create a new account or log in using your existing Gmail or Microsoft accounts

Create a frame

Once the the account set up is completed, you will land on the Home page. Click the “+Create Frame” button

Pick an environment

Name your environment

Select Environment ->

Modern Gallery

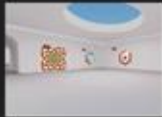

STEP 2.

Gallery options

SCENE SELECTION

At the free tier, users can select from various preset environments in FrameVR, ranging from an island to a GoKart racing track.

We recommend using “Gallery (Small),” “Gallery (Large),” “Modern Gallery,” and “Exhibition Lounge” to create virtual museum scenes.

EXHIBITION LOUNGE

GALLERY (SMALL)

GALLERY (LARGE)

MODERN GALLERY

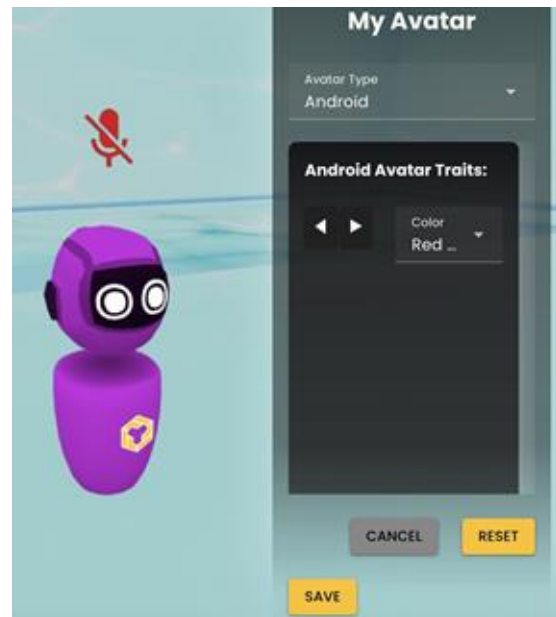

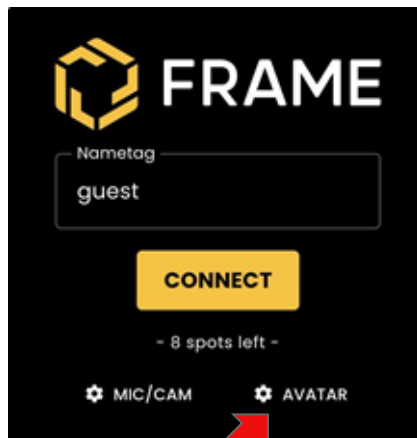

Customize your avatar

Select Avatar Type

Adjust Avatar Color

Hit Save

Microphone

This function controls your voice audio which you can toggle on/off.

You can use the microphone to talk with others in the space.

How to navigate?

Keyboard: Use Arrow keys or W A S D to walk; drag with the mouse to look around; scroll forward and back to zoom in and zoom out

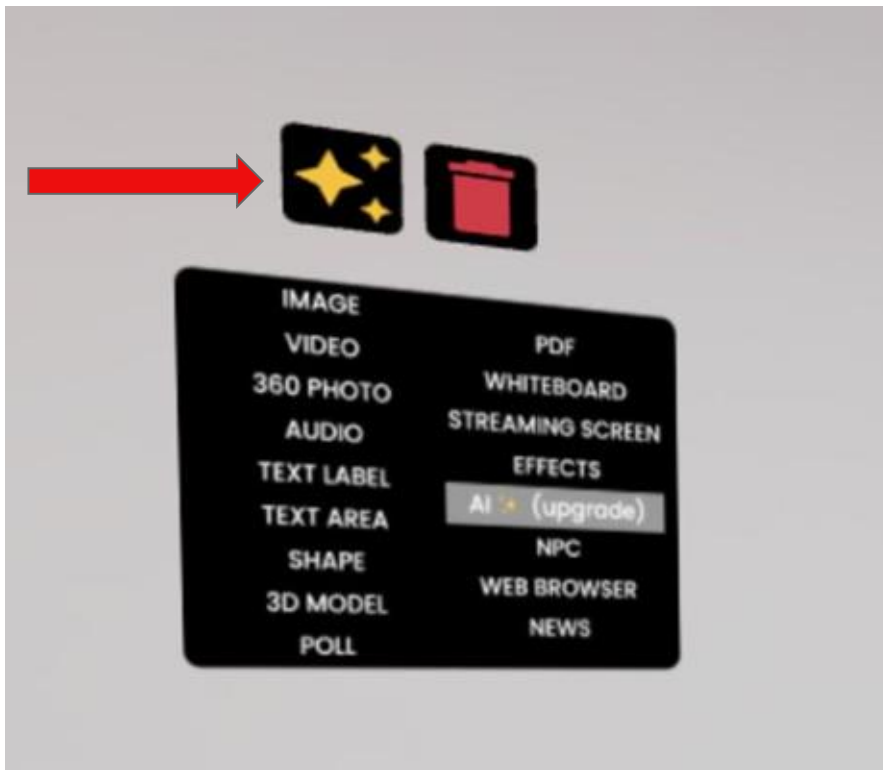

Mouse/Touchpad: Move your mouse or touchpad to look around. Want to move? Double-click your destination. Need to teleport? Hold down the Shift key and double-click to zip to your desired spot instantly!

How to add assets?

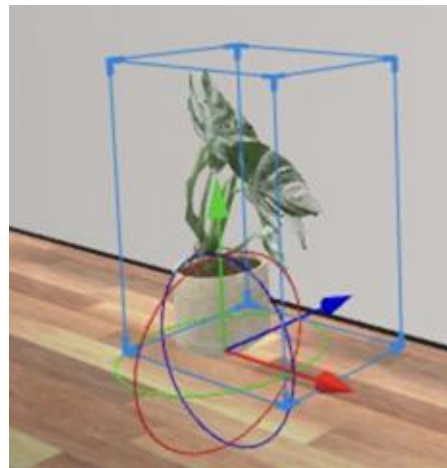

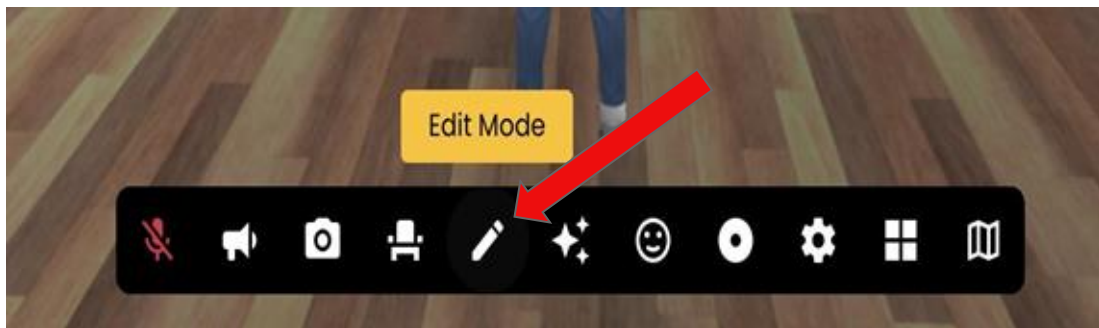

Approach a wall that has a yellow star symbol, click on it

Select the type of asset you would like to add

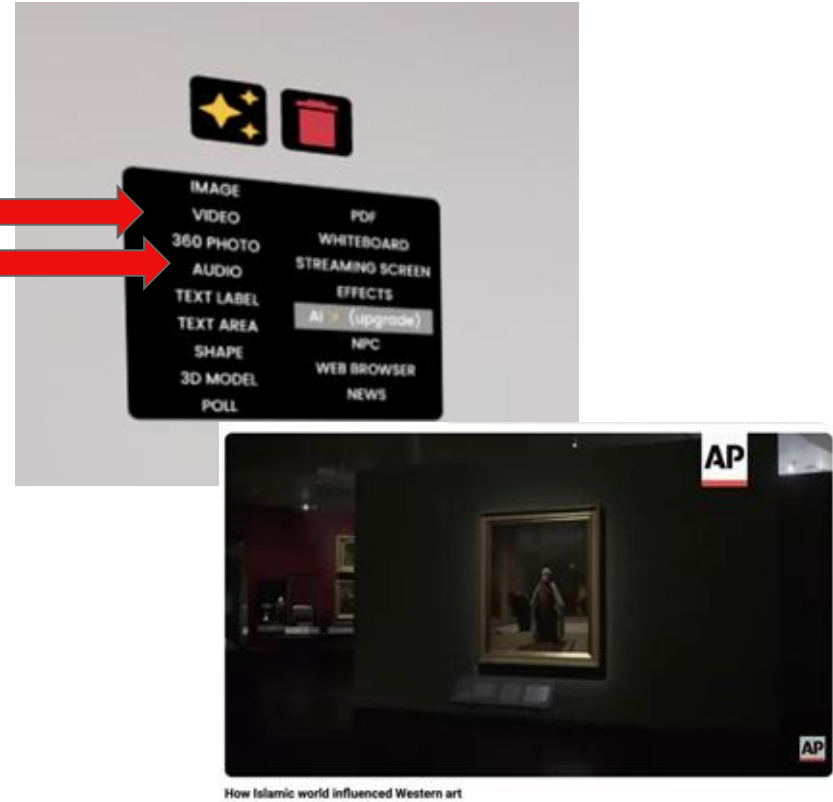

How to move your assets in space?

To position and orient your assets the way you like it to appear, enter the Edit Mode. Once in Edit Mode, you can move, rotate, and scale your assets.

Add audio/video

- Use Video button to add videos then select the file from your computer
- Use the Audio button to add audio files then select the file from your computer

Add text/text label

Text Labels are great for labeling your objects. In Edit mode, you can easily customize their color, background, and transparency. And guess what? You can even add links to them, transforming them into engaging interactive button

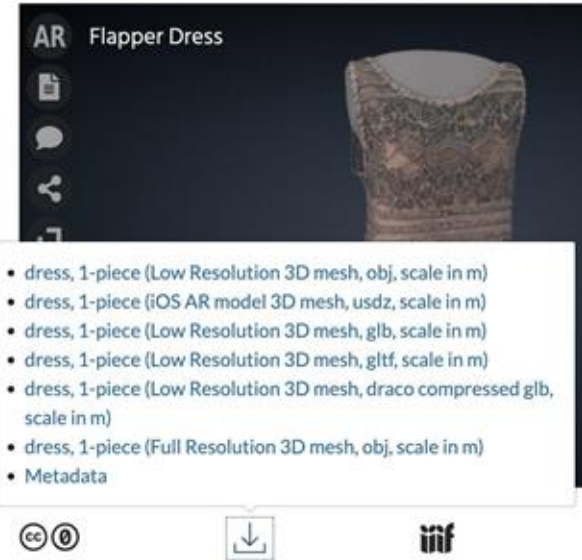

3D assets - downloading

- Use the [Smithsonian 3D Digitization](#) to find 3D objects
- Find an object that suits your exhibition
- Download the object in Low Resolution 3D mesh, draco compressed glb, scale in m

dress, 1-piece

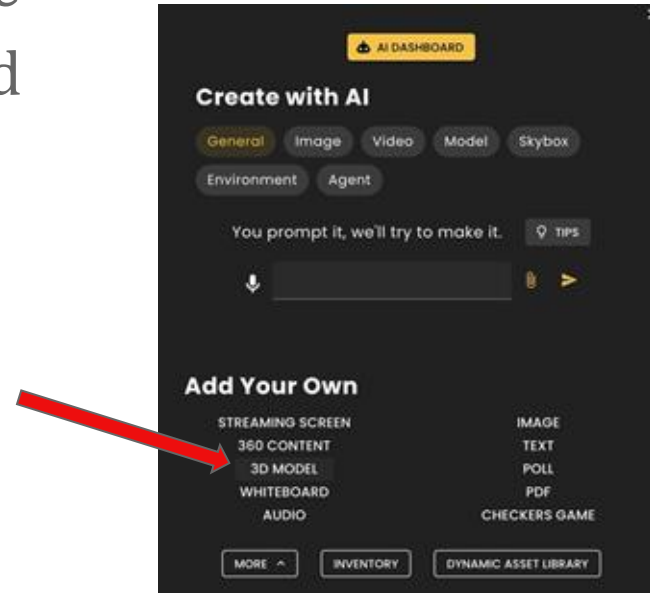

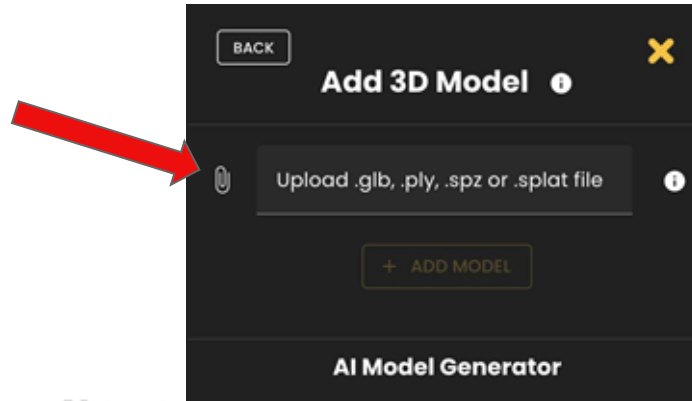

dress, 1-piece

3D assets - addition

To go your Frame -> Hit Creation Menu
-> Navigate to 3D Model -> Click the
clipmark and upload the glb file and
wait

Requirements of the assignment

- 5+ rooms, one story
 - Each space anchors on a single central object, tied into a larger arc.
- 20+ objects minimum
 - Every central object is supported by a constellation of related materials.
- A critical narrative
 - Your sequence engages temporality, colonial histories, and the politics of display.

Anatomy of a Room

- The anchor
 - Give the central object the room's most prominent placement, lighting, or vantage point.
- The constellation
 - Surround it with images, documents, or comparative objects that deepen or complicate its meaning.
- The framing
 - Your labels and layout aren't neutral — they argue for a particular reading of the object.
