

Introduction to FrameVR and 3D exhibition design

ANTH 2800: Museum Anthropology

Prof. Nina Sylvanus

Fall 2026

Digital Integration Teaching Initiative

*Feel free to ask questions at any point
during the presentation!*

Workshop agenda

- What is FrameVR? Why we use it?
- FrameVR vocabulary
- Getting started
- Create your FrameVR

Link to module materials:

Discussion prompt

Visit the following links

- [Virtual Museum of Distance Education](#)
- [Letters Scotland Digital Exhibition](#)

How are these exhibitions different that the exhibitions you have seen in-person?

What are the biggest pros and cons of digital exhibitions?

FrameVR Basics

*Feel free to ask questions at any point
during the presentation!*

What is FrameVR?

- It is tool to create spacial 3D and VR environments
- It can be used directly in the browser
- It supports three environments in the free version
- It does not require a software installation to use it

FrameVR Vocabulary

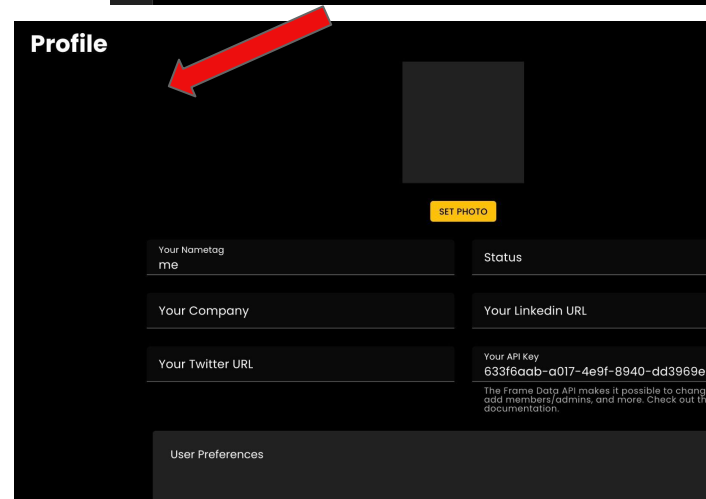

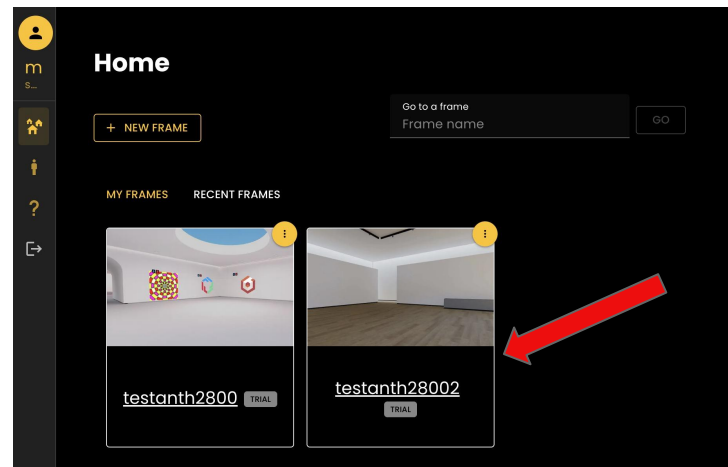

*Feel free to ask questions at any point
during the presentation!*

FrameVR Vocabulary

- Dashboard
- Frame
- Microphone
- Settings
- Environment/Limits
- Main Toolbar
- Sidebar menu
- Inventory/Assets
- Scenes
- Support

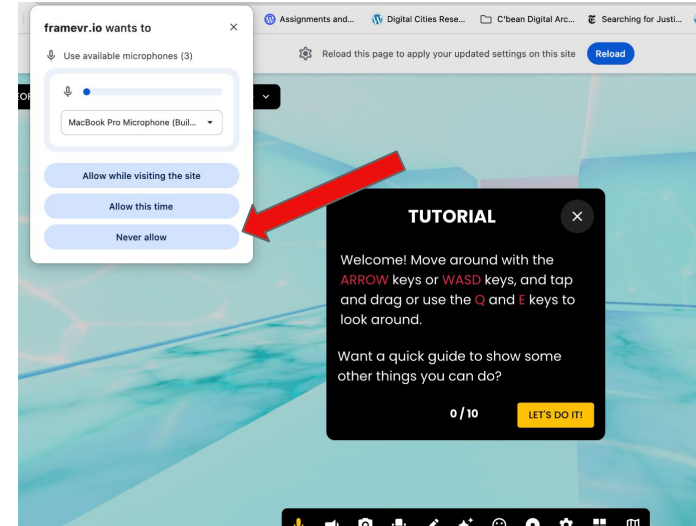

Dashboard (Home)

- Dashboard (Home) is where you can find your Frames and Profile settings

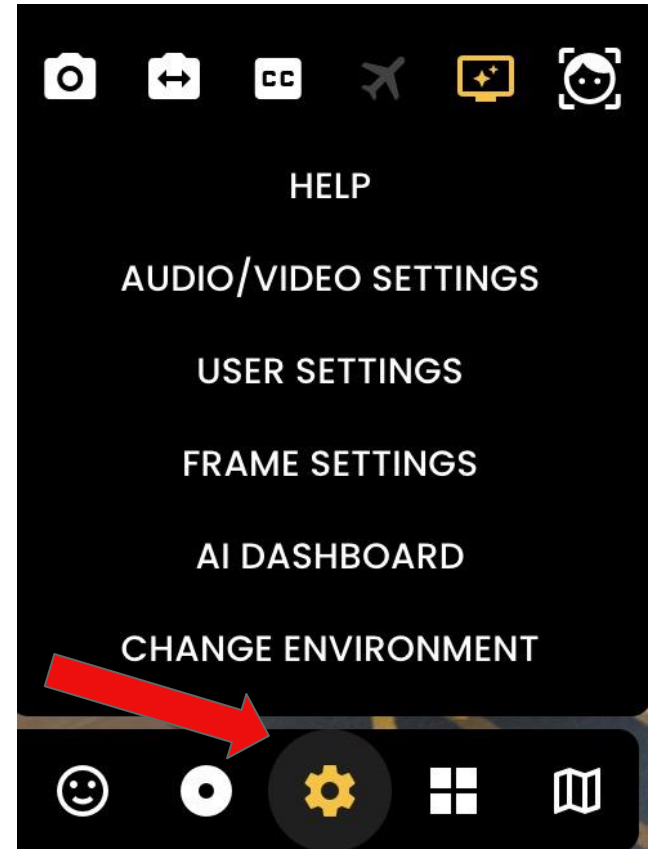

Microphone

- FrameVR is designed as collaborative virtual space for large offices, teams, and classrooms. Microphone allows for conversational engagement in the virtual space
- Once in the frame, select “Never allow” when prompted about access to the Microphone

Settings

- Select the gear icon to view the Settings menu. In this menu you can:
 - Adjust the Audio/Video, User, and Frame settings in this menu
 - Change the environment

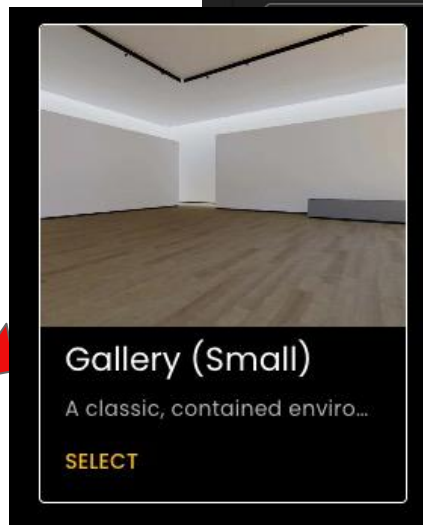

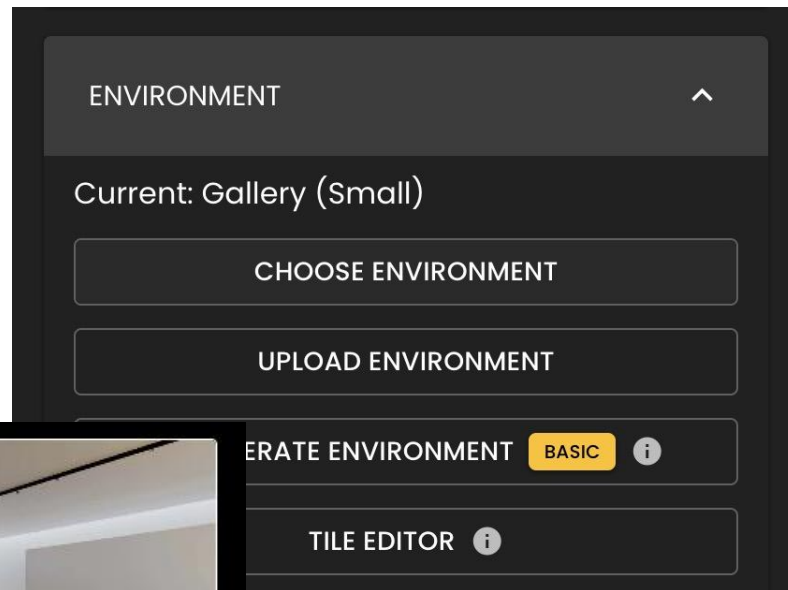

Frames

Frame is customizable virtual environment.

- There are many built-in Frame environments to choose from.
- You can choose to upload your own 3D environment

Environments

- Select Environment option in the Frames menu
- Choose Gallery (small)

Gallery options

SCENE SELECTION

At the free tier, users can select from various preset environments in FrameVR, ranging from an island to a GoKart racing track.

We recommend using “Gallery (Small),” “Gallery (Large),” “Modern Gallery,” and “Exhibition Lounge” to create virtual museum scenes.

EXHIBITION LOUNGE

GALLERY (SMALL)

GALLERY (LARGE)

MODERN GALLERY

Main toolbar

The main toolbar is located at the bottom-center of the frame

Sidebar menu

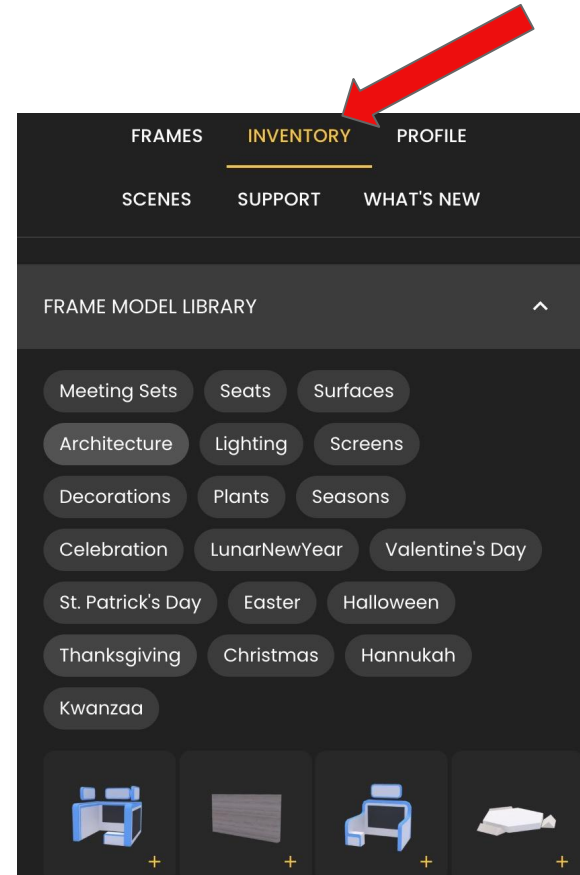

Sidebar menu is located at the top right section of the screen and looks like the sandwich icon.

Inventory and assets

The Inventory menu enables to add or upload models, audio files, PDFs, images, videos, and other assets

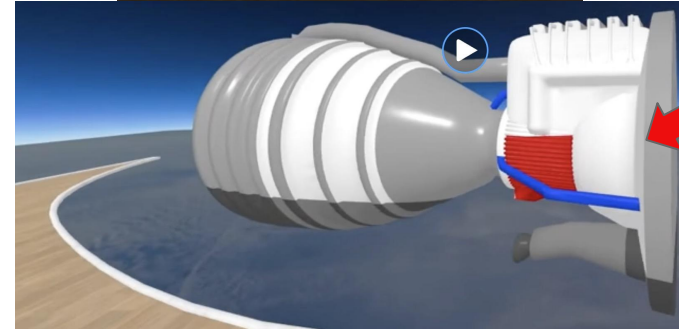

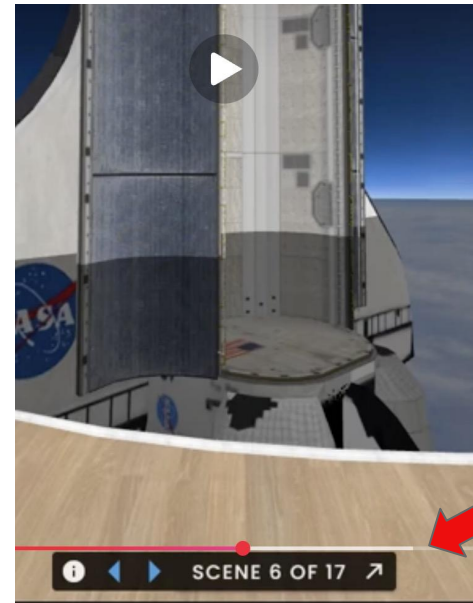

Each piece of digital content in the Inventory is called asset

Scenes

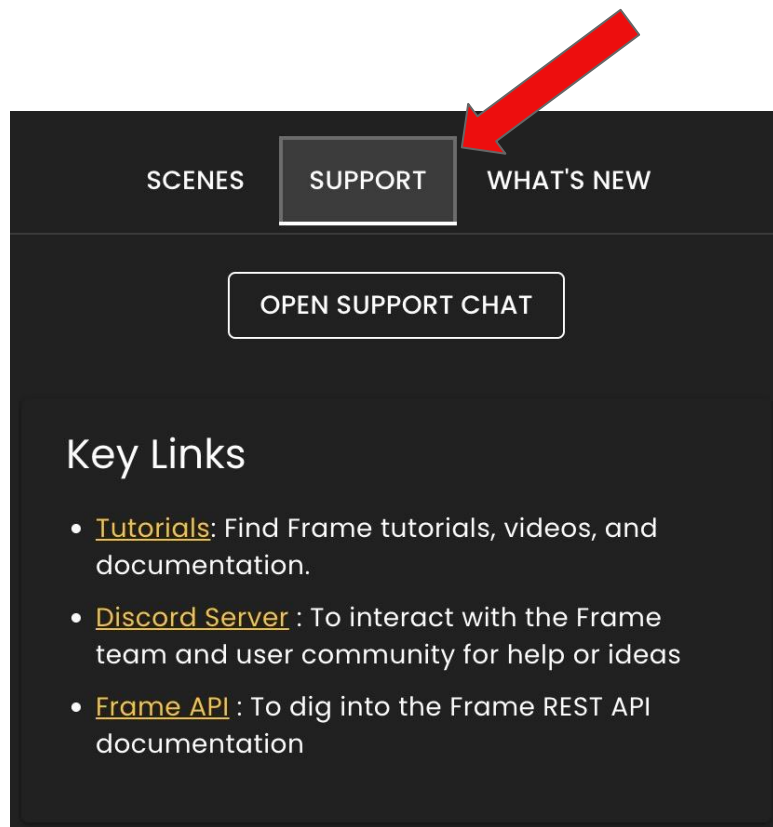

Each scene is a 3D canvas allowing to showcase different assets to your audience.

In the example you see the rocket on Scene 6 of 17, and an engine on the Scene 7 of 17. The background for both is the same.

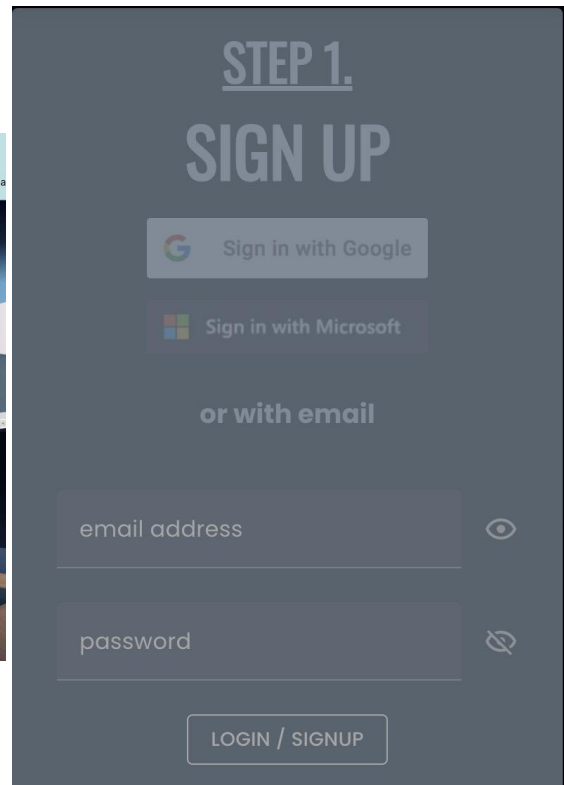

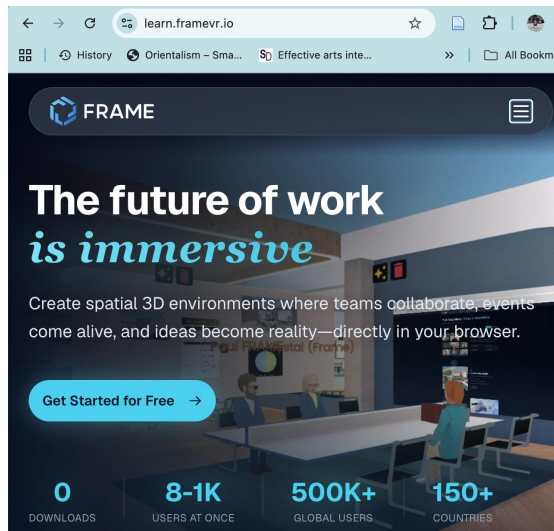

Support

The Support feature in the Sidebar Menu contains essential links and resources when needed

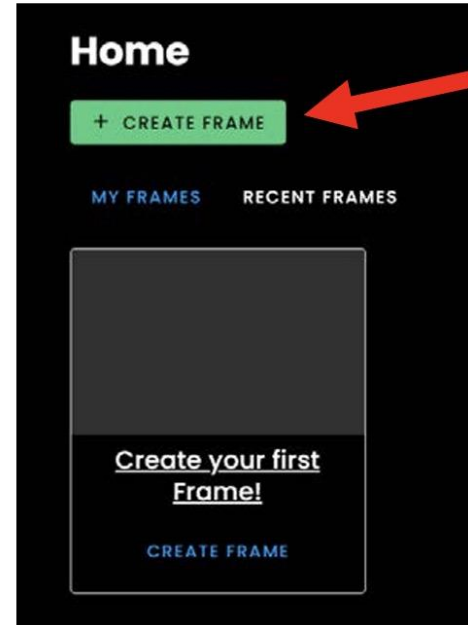

Getting started

- Navigate to framevr.io
- Select “Get Started for Free”
- Create a new account or log in using your existing Gmail or Microsoft accounts

Create a frame

Once the the account set up is completed, you will land on the Home page. Click the “+Create Frame” button

Demo

*Feel free to ask questions at any point
during the presentation!*

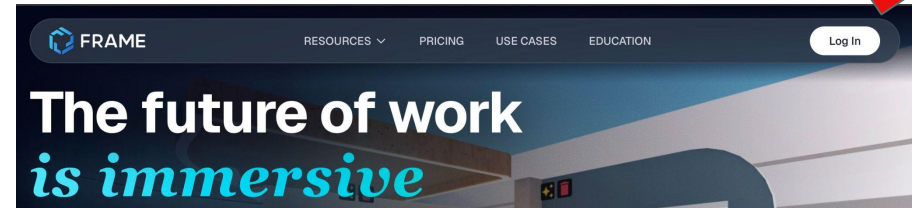

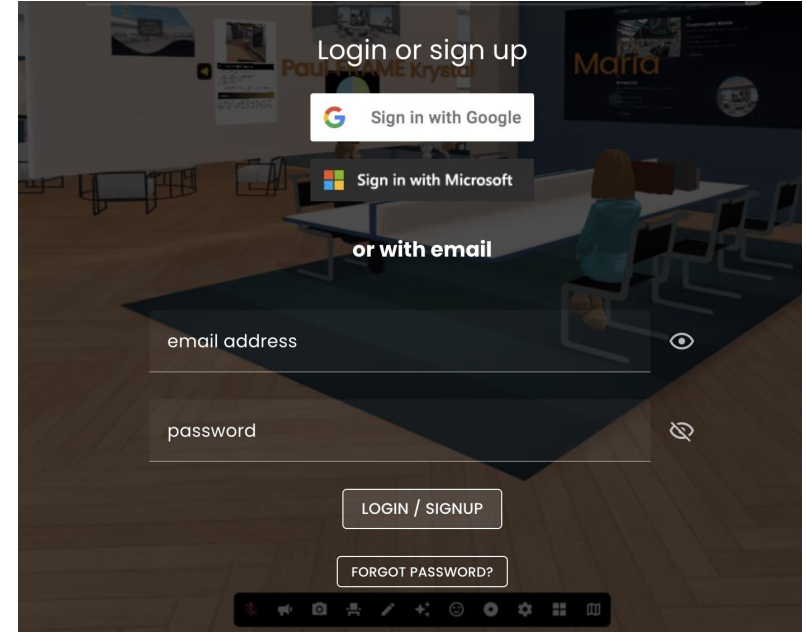

Supplies

- Computer
- SketchFab login
- A Google account
- Midterm: Curating One Exhibition Space assignment

Getting started

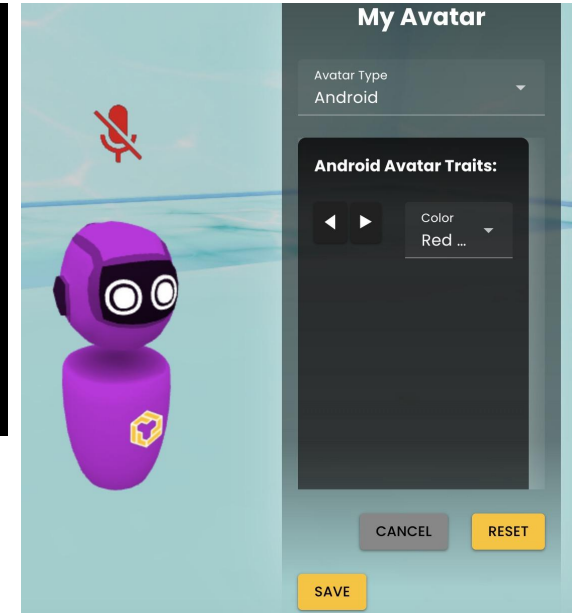

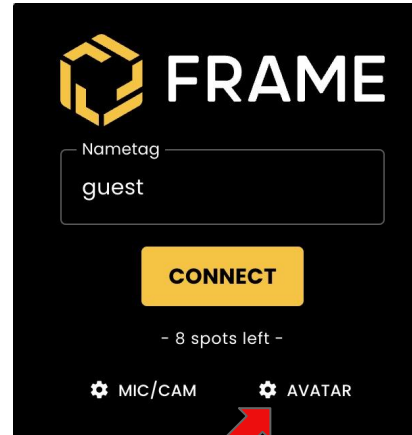

Navigate to <https://framevr.io>

- Click Login
- Scroll down
- Sign in Google, Microsoft or another email
- Set a Password

Customize your avatar (optional)

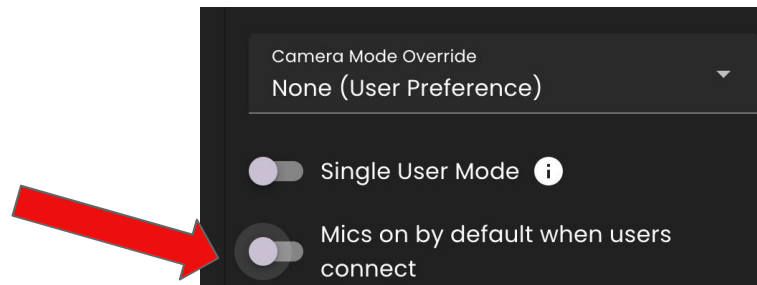

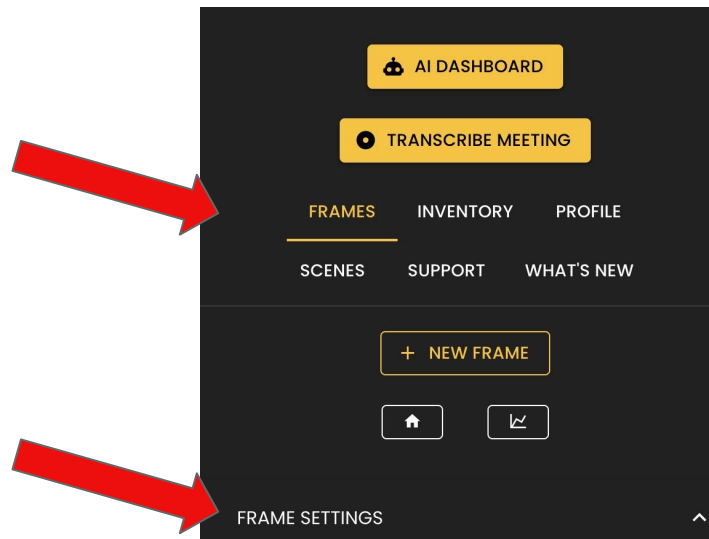

- Select Avatar Type
- Adjust Avatar Color
- Hit Save

Frames

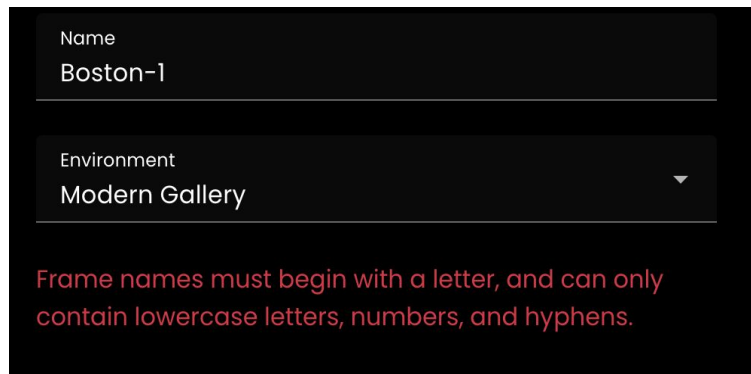

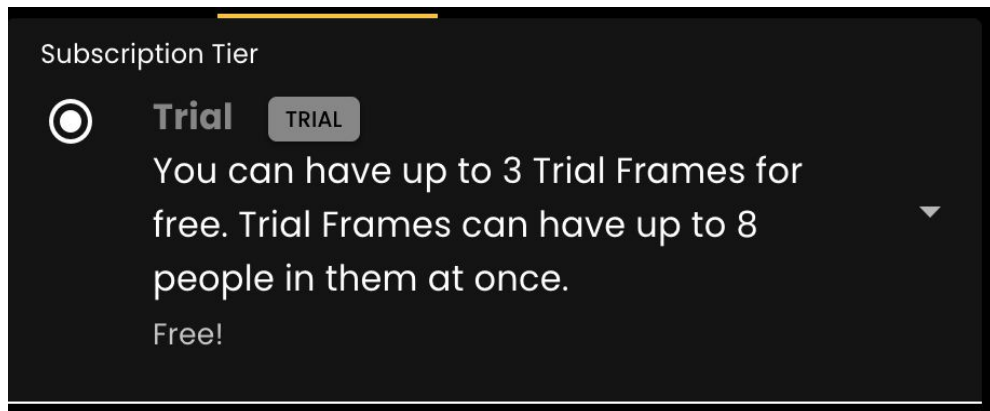

Navigate to the Sidebar Menu

- Click Frames then Frame Settings
- Toggle the “Mics on by default when users connect” off

Limits

Remember that the free version of FrameVR has the 3 Trial environment limit

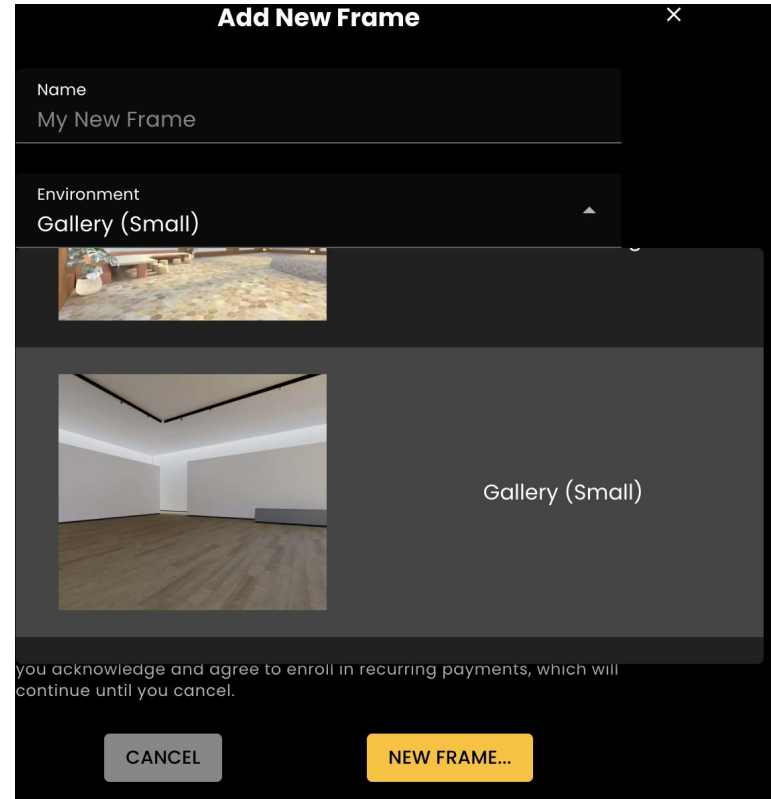

Pick an environment

Name your environment

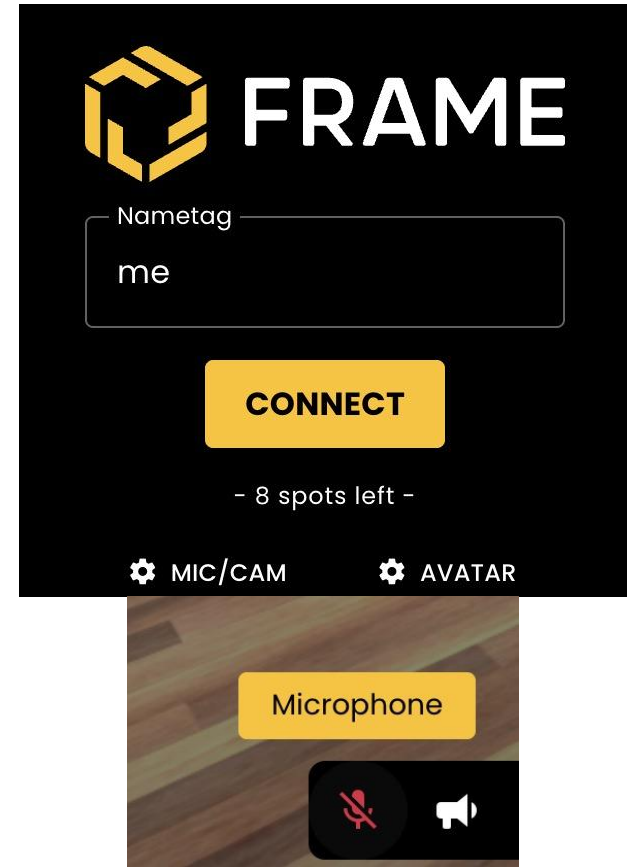

Select Environment ->

Small Gallery

A screenshot of a 'Add New Frame' dialog box. It has a dark background and a close button (X) in the top right. The 'Name' field contains 'My New Frame'. The 'Environment' dropdown menu is open, showing a list of environments. The first visible option is 'Gallery (Small)', which is highlighted. Below the dropdown, there are two preview images: the top one shows a room with a patterned rug and a plant, and the bottom one shows a modern gallery space with white walls and a wooden floor. To the right of the bottom preview, the text 'Gallery (Small)' is displayed. At the bottom of the dialog, there is a line of small text: 'you acknowledge and agree to enroll in recurring payments, which will continue until you cancel.' Below this text are two buttons: a grey 'CANCEL' button and a yellow 'NEW FRAME...' button.

Microphone

- This function controls your voice audio which you can toggle on/off.
- You can use the microphone to talk with others in the space.

How to navigate?

Keyboard: Use Arrow keys or W A S D to walk; drag with the mouse to look around; scroll forward and back to zoom in and zoom out

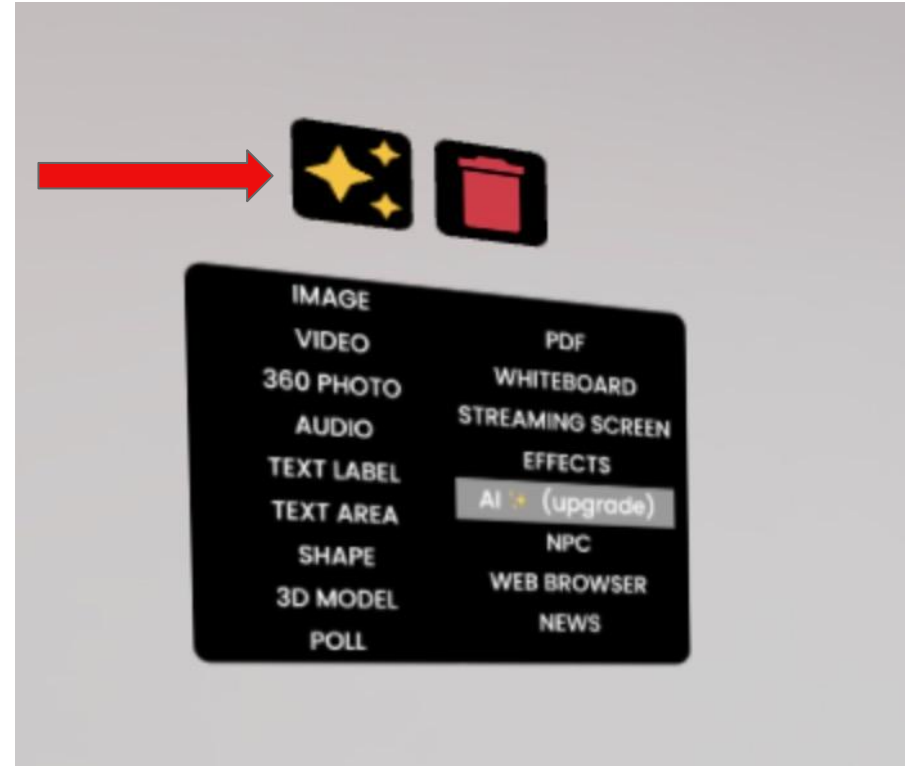

Mouse/Touchpad: Move your mouse or touchpad to look around. Want to move? Double-click your destination. Need to teleport? Hold down the Shift key and double-click to zip to your desired spot instantly!

How to add assets?

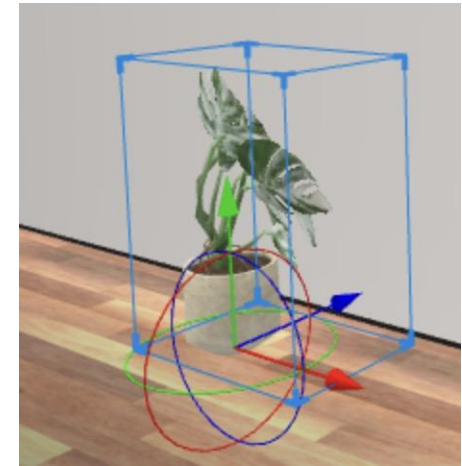

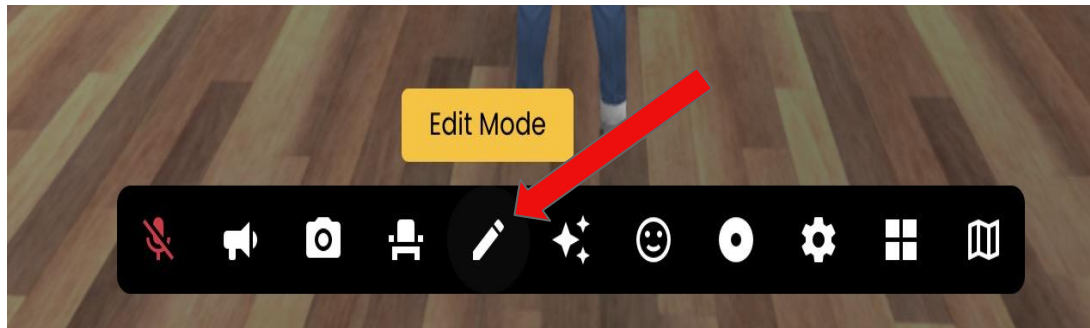

Approach a wall that has a yellow star symbol, click on it

Select the type of asset you would like to add

How to move your assets in space?

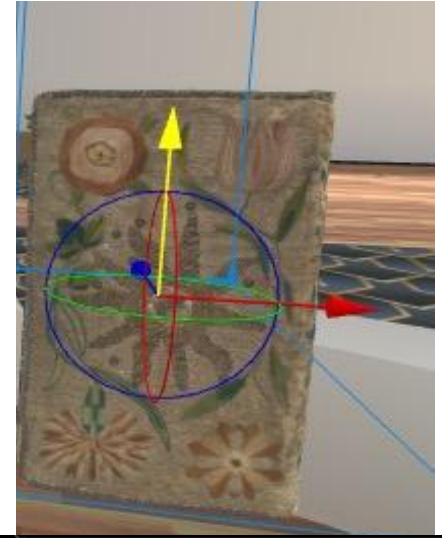

To position and orient your assets the way you like it to appear, enter the Edit Mode. Once in Edit Mode, you can move, rotate, and scale your assets.

Position the asset

To position the object, click on the object and the select Edit Mode.

- Use the colored arrows to move the object three dimensionally
- When the arrow is selected it turns yellow, like in the image

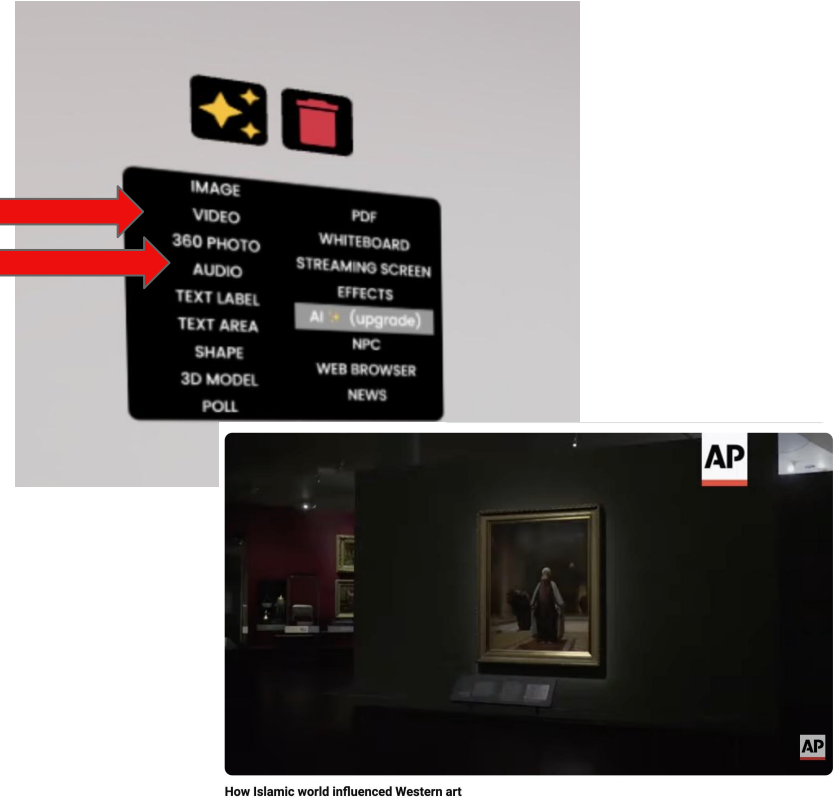

Pick the scenes the asset will be on.

- ☐ Lock Position
- ☐ Snap To Floor
- ☐ Original Size
- ☐ Make Private to Zone
- ☐ Spin
- ☐ Downloadable

Add audio/video

- Use Video button to add videos then select the file from your computer
- Use the Audio button to add audio files then select the file from your computer
- Audio/video - Loop

Add text/text label

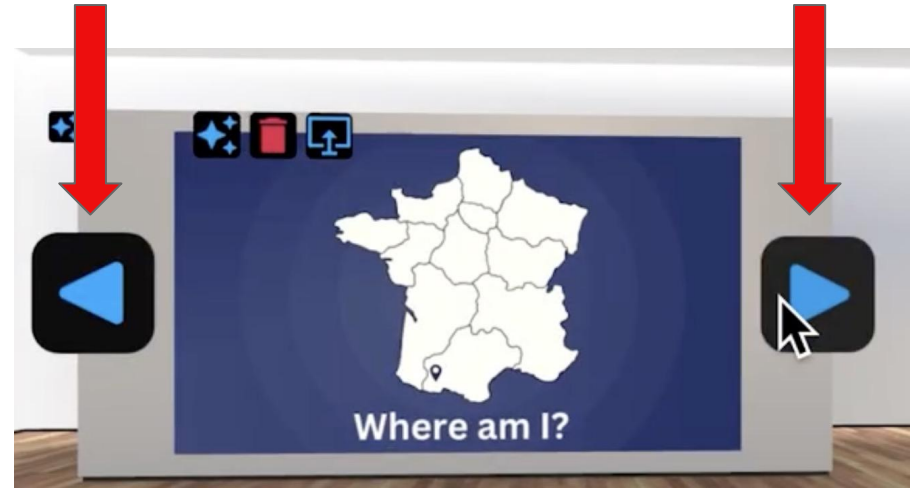

Text Labels are great for labeling your objects. In Edit mode, you can easily customize their color, background, and transparency. And guess what? You can even add links to them, transforming them into engaging interactive button

Interactive PDFs

Upload a pre-existing PDF to create an interactive exhibition artifact

In the example the arrows allow to scroll through the pages of the PDF making the display interactive

Add 3D models with SketchFab

To upload objects from SketchFab you need to have an account

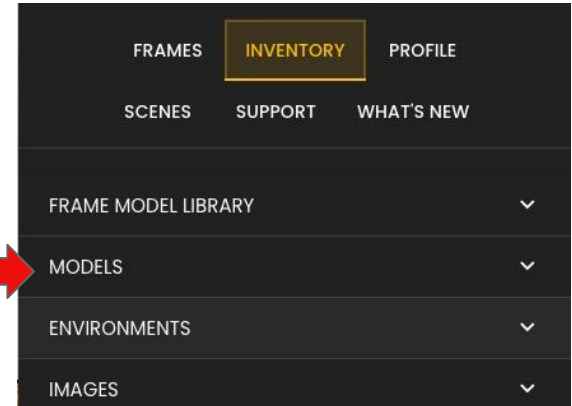

Create a free account on SketchFab

So to <https://sketchfab.com/>

A screenshot of the SketchFab 'Signup to Sketchfab' form. The form has a title bar with a close button. Below the title, it says 'LOG IN OR SIGN UP WITH'. There is a black button with the Epic Games logo. Below that, it says 'OR WITH' and shows four social media login options: Facebook, Google, Twitter, and Apple. Below these is a link 'Log in with company SSO'. At the bottom, it says 'OR WITH EMAIL' and has an 'Email' input field with the placeholder 'you@email.com', a 'Password' input field with a toggle icon, and a 'Lost password?' link. A blue button at the bottom says 'LOG IN WITH EMAIL'.

3D Models from SketchFab

- Select Inventory
- Go to add 3D model
- Select SketchFab
- Search for the object name
- Select the object and hit Import

Magical Truck Adventure - Stegosaurus
by Ziggertron

IMPORT

Choose Model From:

Library

AI

Sketchfab

Inventory
